

Commonwealth Government COVID-19 Response Inquiry- submission

Nabeela Bound

14-12-2023

This inquiry is unlikely to improve public confidence in the Australian governance. Three pages is not enough space to seriously look at the deeply flawed issues of the interventions, certainly we cannot address the egregious behaviour of government in any serious way.

A) The response was based around the reliance of a product that did not go through long term testing. We were told the products were natural and would be out of the body within days. A study from August 2023 has found on testing the blood of individuals vaccinated against SARS-CoV-2 that vaccinal spike protein was present in the blood of 50% of those tested, for between 69 and 187 days.¹ An independent paper published this month² is showing more than 1 in 4 people who have been vaccinated with mRNA “vaccines” experience a misprinting of the proteins, probably due to pseudouridine which has been substituted into the “vaccines”, this is not caused by the SARS CoV-2 infection itself. The authors state the: “error prone” code is a safety concern with a “huge potential to be harmful” and that “it is essential that these therapeutics are designed to be free from unintended side-effects.” There has been a failure by our regulatory bodies to research these potential problems, the TGA was specifically asked about the effects of pseudouridine and this aspect in a particular in a FOI request in February 2022.³ The response that the research documents: “do not exist” show they did not consider and/or do not know the answer to the questions asked. Nor did any other regulatory agency in the world. The altered immune response described in the paper is added to the growing list of Adverse Events.

Research is available showing that products in the vaccines is deleterious effects to human health:

- a) Spike Protein is toxic^{4 5 6 7 8 etc}
- b) Lipid Nanoparticles LNPs’ are toxic^{9 10}
- c) RNA enters the nucleus of the cell^{11 12} clearly shown in the TGA Nonclinical Evaluation Report January 2021 p35.¹³
- d) The Vaccines are considered a gene technology by the FDA, Moderna¹⁴ p70, the American Society of Gene and Cell Therapy,¹⁵ the Australian Governments own website describes the process used in mRNA vaccines as gene technology.¹⁶

Even prior to Australia’s rollout of the “vaccine” the data from Pfizer was clearly showing an enormous level of harm.¹⁷ If anyone looked at the data published in the NEJM^{18 19} they would have noted that the data from Moderna and Pfizer showed no clear evidence of efficacy and certainly did

not show it was a safe product, especially when the supplementary data is studied. Information was purportedly taken from sources who are known to have a high level of corruption and conflicts of interest (COI). Pharma have been repeatedly convicted of criminal charges^{20 21 22} when they have repeatedly misled government, doctors and the regulatory agencies and the general public and been guilty of fraud. “Companies can control information about their products by selectively publishing or suppressing data. financial interests have contributed to patient harm...”²³

Examples of corruption and COI include:

1. Regulatory and advisory bodies^{24 25 26 27}
2. Medical Associations and Universities including Medical education^{28 29 30}
3. Experts³¹ who are frequently wrong³² **“Science is being suppressed for political and financial gain. Covid-19 has unleashed state corruption on a grand scale, and it is harmful to public health. Politicians and industry are responsible for this opportunistic embezzlement. So too are scientists and health experts. The pandemic has revealed how the medical-political complex can be manipulated in an emergency”.**³³ (emphasis added)
4. Medical and Science Journals are “broken”.³⁴ “It is simply no longer possible to believe much of the clinical research that is published, or to rely on the judgment (*sic*) of trusted physicians or authoritative medical guidelines...Medical journals: are “primarily a marketing machine”. Dr [REDACTED] editor in chief of the NEJM for over a decade, accuses “industry of co-opting “every institution that might stand in its way.”³⁵
5. Researchers, scientists and physicians.^{36 37 38 39}

The federal government also heavily conflicted^{40 41 42} showed by its policies and in-actions in the face of state mandates and policies, its main interest is not the protection and safety of the people.

B) In the rush to rely on vaccination, natural immunity was officially “forgotten”. The reliance on vaccine induced immunity is problematic and the science particularly behind vaccinating young people and children was never there.^{43 44} evidence shows natural immunity is at least as effective as

vaccine immunity.^{45 46 47} There are 160+ studies showing the superiority of naturally acquired immunity in Covid-19.⁴⁸ There are a great many more repeat infections among vaccinated individuals. A NEJM piece which cites 16 studies shows that children who had Covid and were subsequently vaccinated, were much more likely to get reinfected than their peers who also had Covid, and were NOT vaccinated. In fact their study showed that the immunity gained from vaccination waned within 20 weeks and the vaccinated children were left with no immunity.⁴⁹

C) It was known early on that the main comorbidities for Covid-19 are metabolic diseases.^{50 51} If the federal government wished to help the people of Australia it was the perfect opportunity to educate the people about healthy diets and lifestyles.^{52 53 54} Even prior to Covid -19, we are faced with the reality that metabolic diseases cause more deaths than Covid. The leading causes of death are shown to be largely caused by metabolic disease:⁵⁵ Cancer,⁵⁶ Diabetes⁵⁷ and Cardiovascular disease.⁵⁸ Cancer causes nearly 10 million deaths globally.⁵⁹ Diabetes kills 1.5 million people a year globally.⁶⁰ Cardiovascular disease kills 17.9 million people a year globally.⁶¹

“Big Food” like “Big Pharma” spend inordinate amounts of money lobbying governments, physicians⁶² and contributing to organisations⁶³ that should be promoting health, but become compromised by the donations and influence of these organisation.^{64 65} Big food have tried to tell us in their marketing documents, they call “research” that the obesity crisis is nothing more than a lack of exercise, while independent research shows diet modification is more effective than exercise.^{66 67 etc} Diabetes type 2 and other metabolic diseases are reversible with the implementation of a low carb diet.^{68 69 70}

People are increasingly aware of the corruption of international and national health organisations that in fact “corruption is embedded in health systems.”⁷¹ Not enough room to discuss the harms of censorship, shutting down discussion by medical professionals and scientists on treatment options and successes has caused untold harms to the worlds population. There is never one source of truth in medicine and science. The excess deaths needs desperately to be investigated rather than using the assumption without evidence that it cannot be the “vaccines” and is due to other issues like lockdowns and delayed medical treatment and checkups. While these things probably had an impact but we do not have evidence to know for sure. The response was not based on evidence.
