

## COVID-19 Response Inquiry - Questions

The current inquiry into the Government's handling of COVID-19 is a waste of taxpayers money. Its terms of reference should be asking much more serious questions. The following are just a few.

- Why did Australia's health officials and Government not fulfil their duty of care to verify if there was actually a health threat?
- Why was the COVID-19 virus never isolated and proven to exist?
- Why did Australia's health officials and Government take their orders from the WHO an organisation headed by [REDACTED] Tedros Adhanom Ghebreyesus, and funded by [REDACTED] Bill Gates?
- Who is Jane Halton really working for? She has worked with the WHO related Coalition for Epidemic Preparedness Innovations and COVAX initiative. She participated at Event 201 which table topped a corona virus pandemic only weeks before the supposed real one, and then was made head of the COVID-19 Coordination Commission. [REDACTED] [REDACTED] Deputy Australian Statistician and [REDACTED] former Victorian Chief Health Officer also should be investigated for their roles.
- Why did the Government indemnify the pharmaceutical companies for an unproven and largely untested vaccine? Who approved this?
- Why is there no investigation into the excess deaths since the *vaccine* roll out?
- Why did NSW Minister of Health, Brad Hazzard and Chief Health Officer, Kerry Chant state that the COVID-19 measures were related to the New World Order?
- Why did the Government ban proven alternative treatments for colds and flus?
- Why did the Government and its officials allow the PCR research tool to be the indicator of illness when its inventor, Kary Mullis, stated that was a research tool not a diagnostic tool? Why was an ineffective RAT test used?
- Who made financial gains from the *pandemic*?
