

To whom it may concern

This is my submission on how the government's response negatively impacted my life. I have stage 1 Autism, OCD and panic disorder. I was unable to access any support systems during the shutdown and due to the mask mandate, I had worsened symptoms due to breathing and touch sensitivity issues.

I had a number of exchanges with my doctor, who I once trusted, due to him trying to coerce me in to get vaccinated. Which I was not comfortable with due to the lack of supporting evidence and having to sign a waiver saying they were not responsible for any negative impact of the vaccine.
