

[REDACTED]

Submission re Covid 19 Mandates and their consequences.

I was a registered nurse of [REDACTED] experience, working in a rural aged care /acute setting in a grade five role.

I was sacked in November 2021 as I was not able to give informed consent to an untested, trial “vaccine”.(which contained ingredients such as monkey DNA, aborted foetal lung cells,metals,and many other toxic ingredients,untested MRNA technology.)Serious Side effects such as stroke, clots, Pericarditis, Myocarditis ,Neurological disorders,Autoimmune diseases, cancer and others were not something I was prepared to risk.

I could not and still am unable to comprehend that a trial drug could be forced onto the whole population. Fear of job and income losses and emotional blackmail “ you could kill your grandparents”is the most blatant form of coercion and bullying I have ever experienced. Informed consent was not provided, as literature provided by workplace [REDACTED] was not comprehensive and Dr’s told by government to parrot that they were safe and effective- Both these statements have been proven to be lies.

I am still unable to return to my profession and have to sit back and watch health facilities deteriorate in their standards of care, due to huge staff shortages. Other states have allowed unvaccinated staff to return to work! Not Victoria, surely mandates should be the same in all states as this was “a global pandemic”. There is no rationale for individual states

and workplaces to implement their own rules in regards to vaccination status. Breach of privacy due to having to provide vaccine status.

- Natural immunity is proven to be the best defence against infection.
- Forcing trial vaccines is not only unconstitutional and a violation of human rights. The Geneva convention and Nuremberg code. Everyone has the right to choose their own bodily autonomy.
- Locking people up, restricting movements and discriminating against people making an informed health choice is the most abhorrent thing I have experienced in my [REDACTED]
- Withholding and not allowing use of previously tried medications- Ivermectin, hydroxychloroquine, zinc, vitamin c, quercetin and doxycycline even as a control/comparison method was disgraceful.
- Doctors and nurses and other employees were threatened and sacked if they questioned the government's directions or expressed concerns re safety of trial medication! This is unconstitutional and unconscionable.
- No other forms of treatments were tried during the “pandemic”. No trial data has been released!
- Government not recognising severe side effects deaths and injury which have resulted from this trial vaccine. >35,000 excess deaths in the past 18 months. (far more than deaths from covid). Very little monetary compensation offered/ available to those suffering

vaccine side effects/illness/deaths - this must be improved!

- Government has lacked transparency.
- I personally have lost my income and profession.
- I have been discriminated against , denied the right of free movement, right to work , right to make my own informed health decisions.
- I have lost friends who do not agree with my personal health decisions.
- I have and still am suffering anger, depression, alienation as a result of these mandates.
- We were forced to wear masks unnecessarily as these did not stop transmission of covid (as printed on the boxes) and caused further alienation and diminished oxygen supply.
- Covid death numbers were enhanced and monetary incentives given to doctors who wrote covid 19 as cause of death. Totally unreliable data.
- I was denied access to visit my [REDACTED] who was in residential care. He suffered [REDACTED]. This caused both of us undue stress and emotional pain. He died as a result of poor care which I blame decreased staff numbers and staff experience for.
- He has died and I cannot ever have that time with him and have been denied memories and experiences with him.
- Dr [REDACTED] produced (covax 19) a safe and effective protein based vaccine - not tried/Trialled in Australia, disgraceful. This would have been a chance for Australia to lead the world in a safe vaccination program.

- Establishing a [REDACTED] factory in Australia, known to be ineffective and has more side effects than any other drug ever produced!! A royal commission is urgently required to bring to light why decisions were made and why mandates were enforced with no long term or trial data being released?
- The force used by police against passive protesters (rubber bullets, man handling and arrest) was abhorrent and so unaustralian. I hope to never see this again.
- The financial devastation, emotional pain and suffering and loss of ability to work has crippled Victoria and Australia.
- The reaction to another strain of flu was an overreaction and only those with chronic severe illness were at risk.
- Correct figures of numbers of death directly resulting from Covid and resulting from Covid 19 vaccine injuries need to be made public.
- No trial drug should ever be allowed to be forced on anyone ever again like it has been. My dismay and despair about the vaccine mandates will stay with me for the rest of my life. I cannot forgive the powers in charge for this destruction of Australians' way of life.
