

Submission to COVID-19 Response Inquiry

Please consider the following actions and failures in Public Health Measures which needs to be seriously looked into:

1. Unethical Vaccine Procurement and Secret Contracts

- **Transparency Lapses:** Potential instances of opacity and lack of accountability in vaccine procurement deals. Investigate the financial incentives or potential benefits received / offered to individual state leaders for procuring vaccine deals.
- **Influence of Corporations:** Explore potential corporate interests affecting procurement decisions. Were the decisions made in the best interest of Australia and its citizens?

2. Mask Mandates

- **Efficacy vs. Freedom:** Discuss the balance between the effectiveness of mask mandates and individual liberties.
- **Public Compliance and Backlash:** Analyse public reactions and the societal impacts of these mandates.

3. Lockdowns

- **Social and Economic Fallout:** Detail the adverse effects of lockdowns on mental health, businesses, and communities.
- **Government Response:** Evaluate the effectiveness of government support during lockdown periods.

4. Vaccine Mandates

- **Ethical Concerns:** Examine the ethical implications of mandating vaccines and its effects on personal choice and violation of basic human rights.
- **Legal Dimensions:** Explore the legal basis and challenges surrounding vaccine mandates.

5. Official Misinformation and false statements in the Media Regarding Vaccine Transmission Blocking

- **Media Responsibility:** Critique instances where media failed to accurately represent vaccine capabilities.
- **Impact on Public Trust:** Discuss the repercussions of misleading information on vaccine efficacy.

6. Vaccine Injuries

- **Acknowledgment and Support:** Shed light on cases of vaccine-related adverse effects and deaths and the support available to affected individuals.
- **Reporting and Transparency:** Discuss the need for transparent reporting of vaccine-related injuries.

7. **Media Censorship and Silencing of Doctors**

- **Freedom of Speech:** Discuss instances of censorship and its impact on the exchange of vital information.
- **Medical Expertise Suppression:** Highlight cases where medical professionals were stifled for sharing dissenting opinions.

8. **Role of AHPRA and ATAGI in Censorship and Oppression of Doctors**

- **Regulatory Oversight:** Evaluate the role and responsibility of organisations like AHPRA and ATAGI in managing medical discourse.
- **Professional Ethics vs. Regulation:** Discuss the balance between regulatory control and professional freedom.

9. **Appalling Treatment of Victims**

- **Humanitarian Approach:** Advocate for better support systems for victims of adverse vaccine effects and their families.
- **Justice and Accountability:** Address the need for accountability and fair treatment of those affected. Consider appropriate action legal or otherwise on individuals and corporations whose policies and decisions directly resulted in loss of life, significant injuries (mentally and physically) and livelihoods and wellbeing impacted on the Australian population.
