To the COVID-19 Response Inquiry Panel,

**Subject: Request for a Royal Commission to Investigate
COVID-19 Response Measures**

Introduction:

I am [REDACTED], a concerned citizen, personally affected by the COVID-19 pandemic response. I am writing to advocate for the establishment of a Royal Commission to conduct a comprehensive and independent investigation into the various aspects of the pandemic response, particularly those that have had direct impacts on individuals like myself.

1. Necessity for a Royal Commission:

The complexities and nuances of the pandemic response cannot be fully encapsulated by the current inquiry. A Royal Commission is imperative to uncover the truth and provide a platform for those affected to be heard.

2. Vaccine Procurement and Secret Contracts:

Transparency in vaccine procurement and contract disclosures is essential. The public deserves to know the details of agreements that have such far-reaching implications on their health and wellbeing.

3. Mask and Lockdown Mandates:

A thorough examination of the decision-making process behind mask and lockdown mandates is needed. These mandates have had profound social and economic effects, and their efficacy and impact warrant a complete review.

4. Vaccine Mandates and Media Misinformation:

The implementation of vaccine mandates and the role of media in spreading information, or misinformation, about vaccines need to be critically examined. This includes assessing the accuracy of information regarding vaccine effectiveness in preventing transmission.

5. Personal Experience with Vaccine Injuries:

As someone who has suffered adverse reactions from the mRNA vaccine, I can attest to the significance of these issues. It's crucial that vaccine injuries are not only acknowledged but thoroughly investigated. Support and assistance for those who have suffered as I have are urgently needed.

6. Censorship and Silencing of Medical Professionals:

The potential suppression of medical opinions and the roles of organizations like AHPRA and ATAGI in the censorship of healthcare professionals should be rigorously investigated to uphold the integrity of medical discourse.

7. Treatment of Victims:

The response to individuals who have been adversely affected by pandemic policies or vaccine side effects deserves careful examination. Their experiences and the adequacy of support provided must be scrutinized.

Conclusion:

A Royal Commission is the only avenue capable of undertaking an investigation with the depth and breadth required for these complex issues. The Australian public, including those of us who have been directly impacted, seeks transparency, justice, and accountability from our government.

Attachments:

- Vaccine mRNA pericarditis diagnosis from treating cardiologist.
- Hospital Letter

I trust that the Panel will consider this submission with the seriousness it deserves and recognize the imperative need for a Royal Commission.

Sincerely,
