

I strongly urge the Labor government to undertake a proper investigation via a Royal Commission to ensure that the following points I submit are investigated thoroughly.

1. A full investigation into the vaccine procurement. The conflicts of interests that exist between the Pharmaceutical companies and some members on the board of the TGA,
2. A full disclosure of the science behind all the lockdowns. The result of the lockdowns was the cause of stress, aggravated medical illness, loss of income and the incurring of added expenditure in my family. My [REDACTED] who resides in [REDACTED] came to Australia in January 2020 to farewell a dying relative, who subsequently died in February. She was due to fly out of Australia on an [REDACTED] flight in March, however before she could leave, the country and States were all locked down. No flights in or out of Australia until late July 2020, when she was able to board an [REDACTED] flight back to [REDACTED]. She was trapped in Australia from March to July 2020. And here I give a brief description of what this caused her. She has rental properties in [REDACTED]. No one was there to collect rents, tenants did not pay for 5 months. She is a [REDACTED] and has [REDACTED]. She ran out of her medication and couldn't get more until she could see a doctor. Not easy to do without a Medicare card. Even though she is a pensioner that was not recognised here so she was required to pay the full cost of medical services. In [REDACTED] as she is on the State register for serious illness, her medication is free. While trapped in Australia, not only was she required to pay full price for her medication but it was difficult to obtain. For example, she is on tablets of [REDACTED] for her [REDACTED] this was banned by the government. So it was virtually impossible to find a doctor that wasn't scared to write out a script, { which addresses also my point 6 below}, and still even harder to obtain the medication. To not be able to get her medication has caused damage to her health.
3. The vaccine mandates. Why it was ok to ignore "informed consent" and force everyone to have an experimental drug injected into them with the threat of job loss. Why were basic human rights ignored.
4. A full disclosure behind the misinformation and continued lies by media, and government authorities regarding the ability of the vaccine to block transmission.
5. The censorship of vaccine injuries and the poor treatment that those injured have received.
6. The role AHPRA and ATAGI have played in censorship and silencing of doctors.
7. The role of the police force in the violation of democratic rights of law abiding citizens.

Prior to the election Mr Albanese promised a Royal Commission and full transparency. I'm only reminding him of his promise.
