

I was involved in a major MVA in 2020 that left me with [REDACTED]

The government's overreach in to who could see specialists and doctor's based on "vaccine status" left me without the care I needed at the time and has left me with [REDACTED]

We all know now that these so called "vaccines" weren't what they were cracked up to be and forcing them on a population was immoral and wrong. The correct term for these should be "death jabs" or "bio weapons."

One of my [REDACTED], who had NO pre-existing medical conditions ended up in the ICU after being injected with [REDACTED], my [REDACTED] almost died two days after his

3rd injection [REDACTED] and my [REDACTED]
[REDACTED] also ended up in
emergency after his second [REDACTED] shot
and both of my [REDACTED] died
within months of one another after taking
these!

Due to my medical history I was warned by
two GPs NOT to take it as it wasn't
necessary and after seeing all the
complications from those around me and
in the media, I'm glad I didn't fall for the
propaganda.

You turned families against one another
(including my own), refused medical
treatment (including myself) and did NOT
allow us to visit our dying family members
NOR my [REDACTED]
[REDACTED] and was admitted to hospital and
then a nursing home where we weren't

able to see her for almost a year!!!

I now have to live with these chronic injuries due to your imposing of these ridiculous mandates for the rest of my life!

You should ALL be ashamed of yourselves!
