

In the earliest days of the pandemic, the Federal, State and Local Governments could be forgiven for almost anything, HOWEVER as these responses do in many instances still endure, despite having been discredited, leaves ordinary Australians to deduce that we are not being governed well or wisely.

This enquiry, with a ridiculously short lead time, and curious timing (right on Christmas) also leads one to speculate that it is not likely to address the concerns of almost all ordinary Australians.

Clearly politicians, bureaucrats and even so called medical experts are never likely to admit any fault or accept responsibility for the incoherence of the response measures as measured in the eyes of the Australian public.

What is ultimately required, for full transparency and insights for future such emergencies, is a full Royal Commission... however clearly this is unlikely be allowed. Therefore, we the people, will ultimately need to resort to class actions and a full judicial enquiry with jail terms and other financial penalties for those that have blocked a Royal Commission.

To the facts:

- a. No mandates at any time, were based on best practice, or what was widely accepted measures, practised and tested before this.**
- b. All mandates destroyed community spirit and pitted Australian against Australian. This will be the greatest cost to us.**
- c. The Federal Government acted un-constitutionally and never had the right to:**
 - i. Dissolve parliament and appoint a National Cabinet, with the Prime Minister having multiple portfolios.**
 - ii. Indemnify drug companies for any product ever, BUT especially if they withhold all data and trial results from being released to all people that will take the drug.**
 - iii. Close state borders. We are, since federation, one nation, and state governments acted unconstitutionally by excluding Australians from unfettered access.**
 - iv. Allow the states, employers, and others to mandate vaccines, without full disclosure, and confidential patient doctor information with individual permission by that individuals doctors.**
 - v. Never should people have to disclose their vaccination or any other status in any place. That is private.**
- d. Masks were mandated and they have never been seen as a barrier to viruses such as Covid.**
- e. Other treatments that have been effective in India and Switzerland, had efficacy markedly higher than the path chosen by Australia.**
- f. The cost of the Vaccines have never been disclosed in entirety and Australians are entitled to know this.**

The profits of the drug companies is an indication of the scale of this scam.

g. What happened to isolate those at risk and get on with life and business. To shut down the entire economy, and borrow heavily to fund the stay at home mandates will punish generations to come. The best analysis by Professor GIGI FOSTER Is that it cost Australia \$63 for every dollar spent. That is criminal in itself.

h. NO PERSON should now, still be stood down from work, and should be reimbursed, NOT FROM TAXPAYERS FUNDS, in any way for personal health choices, especially considering:

i. Covid has a survivability of over 99% and many of the deaths in the earliest days of this pandemic were caused by treatments that now are considered deadly ie Remdesivir.

ii. The vaccine did not reduce transmission nor does it reduce the impact of an infection... and every Australian has now had Covid and therefore has natural immunity

I. The all cause death statistics since the roll out of the vaccine is between 10 and 20 percent above the average... AND FOR THE SENATE TO VOTE AGAINST AN ENQUIRY INTO THIS IS ABSOLUTELY CRIMINAL.

In conclusion then, The Federal Government, state governments, big business employers and medical bodies were clearly involved in this scam and all key players, if not willing to contribute to a Royal Commission for the nation to learn from and never repeat the mistakes, then they are likely guilty of crimes against humanity, and must ultimately be brought to justice.
