

My name is Elizabeth Watson, and I am 64 and a carer [REDACTED]

When the Covid 19 pandemic panic began, I was working for [REDACTED]
Regional Library [REDACTED]
NSW.

[REDACTED] library staff enforced all the ever-changing rules instigated by the Government: distancing, mask wearing, hand sanitizing, sanitizing computer stations and desks used by the public, quarantining returned items, and eventually, mandatory vaccination.

As an employee of the library I enforced and followed the rules, but because of my Anaphylaxis, I had concerns about getting the vaccination and decided against it. Other members of staff that I worked with considered me to be a threat to their health because of my refusal to be vaccinated, and were happy to express their opinion of my personal decision to me.

When lockdowns were instigated, I was then locked out of the library, businesses, and shops, and could only go to the local supermarket for whatever basic food items that I could buy – as long as I wore a mask. I was discriminated against because vaccinated people could freely go into any shop or store they chose to unmasked. Vaccinated people were also allowed to travel freely to wherever they wanted to go, and were able to visit vaccinated relatives and friends. I was not allowed to leave my own home, and could go no further than the end of my street, and I could not see any friends or relatives. Basically, I was put in jail by my own Government.

I made an appointment to see my local doctor to discuss my health concerns, and was told that he would not give me an exemption to the vaccination. He asked about [REDACTED]

The Government began their misinformation campaign by telling us that the Covid vaccine would immunise us against the virus. Then their story changed to telling us that the vaccine would help us to fight the virus. Then that narrative changed as well to telling us that as long as we kept getting vaccinated we'd stand a better chance of surviving the virus. Now Pfizer and other vaccine companies are admitting that the vaccines were never going to stop the virus, but rather it is here to stay. There was no actual evidence that mandatory vaccination, nor mandatory mask wearing, nor lockdowns did anything at all to stop the spread of the virus. It certainly helped the spread of mental illness, discrimination, loss of compassion for fellow human beings, and paranoia.

After still being in lockdown for months, while vaccinated employees returned to work, I was finally told by [REDACTED] City Council, (who are the oversight council for the library), that I would lose my job if I refused to vaccinate. So after almost 13 years with the library, [REDACTED] City Council fired me, effectively taking away my life and ending my friendships with the people I worked with.

Medical practitioners not being paid off by the W H O and the pharmaceutical companies tried to let everyone know that they were being lied to, but they were brutally suppressed and discredited in order to allow the Government to enforce their propaganda and scare mongering campaign through the media's dissemination of their lies.

Unbelievably the Government are still promulgating that lie, and are still being supported by the media, pharmaceutical companies, and medical practitioners who are refusing to admit the actual statistics and repercussions of the vaccine, while holding out their hands for their next gratuity from the W H O and their

██████████ The scare mongering is a constant background to our daily lives, with headlines berating us about the next pandemic, a worse Covid, deadly measles, mosquitoes, microbes, encephalitis, and how will we cope without the W H O to lead us into slavery.

Do we need a Royal Commission into the inhuman, illegal, discriminatory lies that Federal and State Governments forced on us? Yes we do.

Do we want the Federal and State Governments to stop lying to us about the real statistics of Covid 19 and the damage done to thousands of peoples lives through forced mandatory vaccinations, and the fact that none of the measures forced upon the people of Australia were necessary? Yes we do.

Do we want the W H O to be responsible for taking our personal health decisions away from us entirely and locking us into quarantine ██████████ camps where we have no rights over whether we live or die, or what experimentation is carried out on us - all with the backing of our own Government? No we do not. Who would.

I no longer have a job, and my life is now being a carer ██████████ and looking after our house. My former workmates are now no more than acquaintances who I rarely see and no longer talk to. I feel ██████████ still in a kind of 'soft' lockdown, as ██████████ doesn't like to leave the house, and I find myself reluctant to do so as well. The impact of the Covid 19 pandemic with its physical, mental, and emotional fallout is still, to an extent, traumatising us all today. It has destroyed our trust in the medical profession, the media, and in the governing politicians who have proven that they are not here to help the people of Australia, but to help themselves gain a place at the graft and corruption trough through any means they can devise.

A Royal Commission into the complete mismanagement of the pandemic should have already been undertaken.
