

M Armstrong

Covid submission

I wish to firstly state that during the alleged pandemic there was huge government overreach on all levels.

Personal items that affected myself and family

- My wife lost her job this was because the government mandated an experimental vaccine even though she worked alone in an office as an administrator.
- I was made redundant from a position of nearly 26 years
- I had to personally restructure 4 of my contractors and cancel a complete delivery run and combine into 3 delivery runs costing one contractor potential earnings of approximately 120k
- Since these series of injections started my father of 92 [REDACTED], my brothers [REDACTED] and for family members [REDACTED] which may be a coincidence but the timing is incredibly close together.
- Im thankful none has died in my family as that is a known side affect of this drug.

These personal reasons alone warrant nothing less than a full covid inquiry

Over reach by government

- We we locked in our state by a decision made in an illegal national cabinet of state premiers and the federal government
- No-one was allowed to view the minutes from the national cabinet. Why the secrecy?
- No exemptions to the experimental vaccine where allowed for any reason
- Doctors could not work ethically without fear of being deregistered
- The mainstream media colluded with government and did not cover legal protests highlighting the dangers of taking an experimental drug
- It was obvious that governments around the world were in lockstep and our government was obviously overzealous with its attack on the Australian peoples rights.
- Excess deaths are being ignored on all levels of government and media.

I realise this is a small submission and only scratches the surface of all the injustices done by the federal and state governments, however there must be a full investigation and the minutes of the national cabinet must be released for public viewing that occurred during the pandemic. Government departments should not be allowed to ride rough shot over fully qualified medical doctors. State borders cannot be closed into individual countries at the whim of a tyrannical premier/s.

Sincerely M Armstrong
