

Re Submission for Covid enquiry

I am a single parent to [REDACTED] the eldest being on the [REDACTED]. I am also a carer to [REDACTED] who are both in their [REDACTED]

Having lived through the Covid 'pandemic', I want to highlight the extreme trauma that decisions made by both federal government, state government and health officials had on my life and the life of loved ones.

The initial fearmongering that was transmitted 24/7 had such a detrimental effect on all our health. My [REDACTED] were afraid, my [REDACTED] were afraid and it was left to me to try and support them all. It was exhausting, and quite honestly a complete overreach.

The introduction of masks was madness as if this was a virus, masks would be of no benefit apart from hindering breathing. Then came the MRNA vaccines – if anything segregated society this did. To not allow access to loved ones unless you had the forced vaccine was a medical weapon.

Both my [REDACTED] voiced [REDACTED] with my [REDACTED] sourcing a rope to [REDACTED] himself. My [REDACTED] had just started [REDACTED] and could not cope with online learning – he had [REDACTED] years of no education which still impacts him today. My [REDACTED] became a recluse as he was scared to go out of the house, and this is still an issue.

My [REDACTED] were a prisoner of their own home and having lived through the war years, bad memories were stirred up.

I encourage there to be a full independent Royal Commission into the Covid Response as we are still living under the draconian regime today – my [REDACTED] have an interview in their own home scheduled for [REDACTED] with an Aged Care provider and they have been asked to wear a mask????

I cannot understand why mandates are still in place and for those people that didn't get vaccinated, why are they not allowed to go back to work?? Healthcare, aged care, education, police, firefighters are all struggling to get staff. The thousands of people that are off sick after the vaccine, let alone the thousands of people that have died. This needs to be investigated and not covered up.

We live in Australia which is meant to be the land of the free.
