

Regarding: Call for submissions and evidence to the COVID-19 Response Inquiry.

Thank you for reading my submission. I will be brief.

My submission is about simple law abiding people and the impact of Government policy on our life, health, work, finance, and wellbeing as human beings.

I represent myself, my wife, my son, my daughter and her partner, and my two grandchildren in what I'm about to say.

1. We have all always been healthy willing participants in society. We work hard, pay our taxes, help in the community, and always do our best and do the right thing.
2. The state and federal government response to covid destroyed us as a family and as individuals. We may never recover from the barbaric and discriminating policy of our public servants during this time.
3. Because of government policy, none of us were allowed to work or participate in society because we did not consent to take an unapproved, experimental mRNA drug with no long term safety data whatsoever.
4. Yet we were always all healthy individuals during the pandemic and we posed absolutely no health risk to anyone.
5. We were all isolated, discriminated, excluded, violated, demeaned, castigated, and vilified for not succumbing to government pressure and coercion to have a medical procedure which had no safety data whatsoever and no explanation of possible side effects either short or long term.
6. The experimental medical procedure was for a disease that had a 99.95% survival rate and for a virus which for healthy people was nothing more than a seasonal flu.
7. The experimental medical procedure did not stop the transmission of the virus nor did it stop an individual from getting the virus yet it was forced upon me and my family without any consideration to these facts and our legal right to choose what is injected into our bodies.

8. Mask mandates, stay at home mandates, travel restrictions, lock downs – none of these draconian measures have been proven to help stop the spread of an airborne virus yet me and my family were terrorized every day for applying common sense to health and wellbeing as opposed to crazed panic from state and federal members of governments acting like it was the end of the world.
9. Fear reigned supreme instead of information and sound health advise like take vitamin D, exercise, fresh air, good food, positive thinking. On the contrary, we as a citizenry were bombarded every day with fear and anxiety promoting more fear and more stress. We all became fat, miserable and unhealthy.
10. My children and grandchildren have all suffered from mental anguish for being incarcerated in our homes for nearly 2 years. We have all suffered financially without compensation and we have all been made to feel like second class citizens yet we did nothing wrong and broke no law.

I believe good and informed government would have adopted the recommendations of the **Great Barrington Declaration** which basically stated protect the elderly and the vulnerable and to largely continue living in society in the normal way.

This was not even considered. It was tunnel vision. Inject everyone young and old. Natural immunity was not even mentioned. Vaccinate, vaccinate, vaccinate – that was the one and only solution. How absurd to think an unproven experimental chemical was going to save us from a virus. It is so ridiculous it is hard to fathom yet because of the insane governance me and my family had to endure years of pain and suffering for no good reason whatsoever.

We are still suffering; it has not stopped.

And if it happened to me and my family, I reckon it happened to millions of Australians.

Please do not allow this to ever happen again.
