

One of THE most important investigations into the assault on the Australian continent in the past 100 years, responsible for a greater loss of life and God-given basic human rights than any invading combatant force has been promised by the Albanese Labour government but not delivered.

I speak specifically on the SARS COVID 19 “novel” virus that invaded our shores sometime in late 2019 and early 2020. This is a time and place when the Scott Morrison Australian Federal Government decided to take the Bio Security framework put into law in 2015 by the Biosecurity Act and summarily ignore it altogether.

Further, the Morrison Federal Government convened a national cabinet on the 13th of March 2020 (<https://federation.gov.au/national-cabinet>) whose members then collaborated on the various means to overcome the protections put in place for Australian Citizens in our Constitution.

The methods implemented by the various state and territory Chief Ministers and Premiers applied to their citizens was inhuman and cruel, without ANY scientific basis whatsoever. The entire response was based on mathematical models that were shown to have been between hundreds and thousands of per cent WRONG. The damage applied to their own citizen's lives was catastrophic. When the “pandemic” response of Australia is compared to Sweden (<https://www.cato.org/sites/cato.org/files/2023-08/policy-analysis-959-no-link.pdf>) we see an entirely different response that largely relied on the citizens of Sweden to make health decisions for THEMSELVES without being forced or coerced into accepting some state health officers decisions for them.

The concept that human non-medical behavioural interventions such as masks and “social distancing” could stop the spread of a respiratory virus through a population is patently ludicrous. No matter what sort of respirator masks are worn by individuals, a group of virions aspirated by an infected person can always enter the body via the membranes of the eyes. In reality, the entire fiasco was a waste of time and effort. The final insult was insisting that children wear these masks from preschool to college. It was known very early in the “pandemic” that children were not affected by the virus so why should they be vaccinated OR wear masks?

This brings us to the intervention of the World Health Organisation (WHO). The World Health Organisation on 1 February 2020 stated that a public health emergency of international concern had occurred in China with 7700 cases that had been confirmed and 170 people had died. Before this statement, the WHO had insisted that restricting travel from China to other countries was an overreaction. Obviously, with thousands of patients suffering from the symptoms of COVID19 the virus had been in the population of Wuhan for at least several months. The delay in which the WHO acted upon this Public Health Emergency of International Concern (PHEIC) when the outbreak was in China as compared to outbreaks such as H1N1 in Mexico and SARS1 in Hong Kong indicates some intervention by the mainland Chinese health authorities slowing the process. The main question outstanding from this time is why were the Chinese so unwilling to assist in the investigation of identifying patient zero and why were the Main Stream Media so willing to agree with the Chinese authorities on this point, labelling all doubters “conspiracy theorists” given what has

recently come to light regarding [REDACTED] and the Eco Health Alliance working with the Wuhan Institute [REDACTED] ([https://www.technologyreview.com/2022/02/09/1044985/\[REDACTED\]-covid-lab-leak-wuhan/](https://www.technologyreview.com/2022/02/09/1044985/[REDACTED]-covid-lab-leak-wuhan/)) financed by the NIH on EXACTLY the virus that COVID19 happens to be.

In essence, we need to know where this virus was developed, was it at the Wuhan Institute or was it developed as some suspected at the [REDACTED] by [REDACTED]. We need a definitive answer. Whoever did this needs to be held responsible and accountable for billions of dollars in damages and millions of lives lost. The reckless idiocy of the man that financed the virus, [REDACTED] needs to be tried for treason for creating the bioweapon. [REDACTED] the inventor of the bioweapon platform also needs to be tried for treason for creating the weapon and then providing it to [REDACTED] in Wuhan.

In conclusion, we then need to ensure that ALL research on Gain Of Function testing for ALL human diseases is STOPPED worldwide.

We need to ignore the WHO and any suggestion that their bloated idiocracy could manage their way out a wet paper bag is beyond their competence. The WHO's suggested edits to pandemic "agreements" is beyond a joke. I do not consent to have ANY of my health decisions made by anyone but me.

It is recommended that future Australian Governments take note of the Biosecurity Act of 2015 and operate under its guidelines as recommended.

Finally please in future ignore any models developed by [REDACTED] of the Imperial College of London on pandemic outcomes.
