

To COVID-19 Response Panel

Hello and good afternoon,

My name is Kevin and I have a big interest in wellbeing of all people, animals and environments and would like to extend this interest into providing a quick response to COVID-19 response inquiry.

My response will be sectioned based upon the guiding areas for easier clarification and relationship.

Governance, including roles and responsibilities

Firstly, there were many reports that Australia knew about COVID at least 3 months before, why wasn't all people from China, Wuhan blocked from coming into the country?

Secondly, Information within [REDACTED] submissions to Covid select committee highlights many concerns as I have included a comment from 25th May 2020 below

<https://concernedlawyersnetwork.net/wp-content/uploads/2020/10/Harrison-submission-letter-to-select-covid-19committee.pdf>

Start Quote: "Upon examination, the Board Members of the NCCC do not appear to represent the interests of small business or 'everyday Australians'. Instead, they hold senior board positions of companies in mining, oil and gas, airlines, private hospitals, pharmaceutical companies, casinos, and superannuation giants. One member is a billionaire.

Another was recently accused of being 'an international tax dodger' by an Australian Senator. Another Chairs an international organization at the forefront of brokering private-public partnerships and garnering billions in taxpayer dollars to fund Covid-19 vaccine development. The Morrison Government's choice of NCCC board members, and the glaring omission of any member who could be said to represent small business or employee unions, is a farcical premise of 'mitigating the economic and social effects' of Covid-10". **End Quote.**

This truly highlights a loss of trust and accountability with Federal governments and playing out this extremely important event as a game of business and big business. All members of any committee for Government should be voted in by the people. That way harder for the mates, friends and lobbyists to have the bank accounts and pay packages increased.

Broader health and social supports

Firstly, within a pandemic as it has been called, all services should be called upon and guidance provided back and force to states and territories and back towards federal governments to ensure that all services are utilized. Why wasn't all Chinese Medical doctors, Naturopaths and Homeopathic doctors utilized to assist in helping people along with nutritional advice that was circulating around the world during 2020 / 2021 to offset COVID and diminish its affects so all doctors and alternative could have assisted many patients to boost immunity to ward of potential affects.

Secondly, Ivermectin was banned during early stages of COVID yet was fully available prior, TGA and its partners should be held for [REDACTED] like governments for banning substances that they already knew could assist and elevate many peoples sickness, suffering and spreading of COVID.

Community supports

People at all superficial levels of our communities and societies have potential to be responsible enough to cater for their own health, Guidance should have been honored with COVID nutritional advice as stated in previous section end of page. The community with Chemists, Doctors and Alternative Chinese medical, naturopaths and homeopaths working together could have brought the effects and percentages down therefore taking a load off the hospitals and emergencies services.

Financial support for individuals

What was done was fine but maybe its source of where the money came from should not be included in public debt. Australia regardless of economists and [REDACTED] inflationary games, can mint its own money based on Commonwealth Constitution powers.

International polices to support Australians at home and abroad

International policies are a guide not law and never should be. Border closing to other countries is fine but not any further.

Key health response measures

Firstly, why wasn't Ivermectin and many others endorsed since evidence was overwhelming prior to COVID

Secondly [REDACTED] - COVAX-19 was ignored why wasn't an Australian designed and manufactured vaccine used since government can spend all the peoples money overseas but not support its local productions. Shows Federal and states have people in power who are self-invested.

Thirdly, why didn't they use Intravenous Vitamin C since this was advocated by Orthomolecular Institute of America, [REDACTED] etc. and if it didn't fully stop COVID it would have boosted the humans immunity. Even if this was utilized just in Quarantine areas would have greatly reduced the numbers and amount of time, resources and money required.

Fourthly, Homeopathy Vaccination Homeoprophylaxis also could have been used since BIASNESS says following the Scientific method will never understand Homeopathy, but it works and many trials maybe not clinical can endorse, so it should have been offered also to assist.

It is time for what [REDACTED] I wanted like many others is Full holistic health service where all healing modalities from Western, Eastern, Indigenous, Energy medicine come together under a new framework of health to work together to assist people in and out of hospitals, day surgery, clinics etc.

Mechanisms to better target future responses to the needs of particular populations

Everything should be bottom up not top down, there are far too many issues that top down thinks it can fix but all it does is create laws, create boundaries and then ask services and businesses to work at local areas to try and assist. Where there are money issues, resource issues and massive BIAS issues with Natural or alternative medicine then all statistics will never fix or elevate the problems fully.

Support for industry and businesses

When a pandemic or major health crisis occurs (Deliberate with COVID as evidence is truly mounting) supply chains relying on overseas to supply in timely manner is stupid, unrealistic, shows lack of trust, authenticity and accountability to the science and scientists in Australia if not some people are making more money off this unfortunate event than anybody should.

With local manufactured Vaccines and Homeopathy Vaccination plus Intravenous Vitamin C and others and support of all services as stated above, these are more localized so therefore transport, delivery and logistics is easier to manage and easier to supply all people of state, the communities etc.

Lastly WHY do we play international games when Australia has the knowledge, experiences, knowhow, work ethics to already within country, states and communities.

Something is very wrong with our governments and it shows they are fully not accountable to the people, something is very wrong with how all aspects of COVID management was done.

Thankyou

Kevin Woods
