

Call for submissions and evidence to the COVID-19 Response Inquiry

My name is [REDACTED] In 2020 I was working [REDACTED] in a nursing home in [REDACTED]. I am married with [REDACTED] children.

I make this submission because I should. Not because I think it will result in any justice for the people of Australia, and in particular Victorians. That confidence was beaten out of me a long time ago.

I am appalled but not surprised that the scope of this enquiry does not include actions taken by the state governments. This is nothing short of whitewashing and is a deliberate move to keep the proverbial can of worms unopened. Typical. Disgustingly cowardly, but typical.

The actions of the federal government however during 2020 + were cowardly. To fail to uphold constitutional law which overrides state law is a gross negligence of responsibility. Constitutional law speaks of the right to informed consent to medical treatment. During the Covid-19 period, we were not given either the right to refuse medical treatment (eg. the Covid “vaccine”) nor informed consent, because the real impact of so called ‘vaccines’ were unknown. It wasn’t even a ‘vaccine’ in the proper sense of the word as it neither prevented transmission or contraction of the disease, which is what vaccines are supposed to do. And we knew this after reading Pfizer’s first study, and the comments from the CEO. But we were coerced anyway. And it’s since been proven publicly that we were right.

I draw attention to Constitutional law here:

Informed consent to medical treatment [1]

(My additions in black):

10.47 At common law, all competent adults can consent to and refuse medical treatment. If consent is not established, there may be legal consequences for health professionals. (What consequences??) Under the law of trespass, patients have a right not be subjected to an invasive procedure without consent or other lawful justification, such as an emergency or necessity. (Apparently we don’t). At the international level, the CRPD expresses this in terms of a ‘right to respect for his or her physical and mental integrity on an equal basis with others’.^[35]

10.48 ‘Informed consent’ refers to consent to medical treatment and the requirement to warn of material risk prior to treatment. As part of their duty of care, health professionals must provide such information as is necessary for the patient to give consent to treatment, including information on all material risks of the proposed treatment. Failure to do so may lead to civil liability for an adverse outcome, even if the treatment itself was not negligent.^[36] “The world is engaged in the largest clinical trial, the largest global vaccination trial ever, and we will have enormous amounts of data.” – Greg Hunt, 21 Feb 2021 so how can we have given informed consent given we had no knowledge of the material risks given we were in a clinical trial? And where is the liability for adverse outcomes? THERE IS NONE.

Do I even need to break this down? This was completely steamrolled, for a disease that for the majority of people who were not immunocompromised or elderly was unpleasant but from which there were no lasting adverse effects. Far more adverse effects – and deaths – have been experienced from the so-called solution, the ‘vaccine’. And don’t you DARE suggest we weren’t coerced. That suggestion is the most deliberately deceitful and abhorrently insulting thing I have heard from parliament and that’s saying something, because there’s a hell of a lot to choose from in that category.

You denied us the ‘Right to health’ by denying us access to Ivermectin, which was not only harmless if taking the correct human dose but which has legitimate and verifiable benefits as a treatment for Covid 19, - go look at the statistics in India and Uttar Pradesh. You denied us information about the legitimate role of Vitamin D in prevention and treatment. You broke the law in so many ways I can’t count. The Nuremberg Code, the UN charters, the Australian Constitution. There is no redress, there will be no redress, and you have not learnt any lessons. I cannot begin to tell you how angry I

am. I am angry, ashamed of my country's representatives save a few brave voices in parliament and in medicine, roundly abused, cancelled and ridiculed. They were right. I'm not even going to start about the criminality of the denial of freedom of movement during lockdowns and the vilification of the unvaccinated, in ways reminiscent of [REDACTED], including comments that the unvaccinated had no right to participate in society, because of a campaign of fear and bigotry that you allowed at the very least, and I'd warrant more accurately, deliberately fostered. But you will not hold yourselves accountable.

I summarise for the sake of brevity the government's decisions during 2020-2023 impact personally and on my family.

In [REDACTED] was stood down by my place of employment in the nursing home due to the Victorian government mandates, they were unable to answer my questions about the effect of the 'vaccine' and neglected their obligation to provide a safety risk assessment which I requested, (both being a breach of fair work laws). I am still technically employed as they were too cowardly to terminate my employment, knowing it was a further breach of law. But I am not allowed to work there. The Human Rights Commission received so many applications via [REDACTED] they refused to consider them all. Because that's how it should work, right? If there are too many injustices, you sweep them under the carpet for the sake of bureaucratic efficiency. The effect was that I was considered effectively 'leperous' because I declined to be injected with something I didn't know the effects of. My livelihood was gone and we were financially penalised, which was needless to say extremely stressful. My right, by federal law, is to decline medical treatment, but I was penalised, barred from employment, entry into doctor's clinics, shops, hairdressers and anything else deemed 'unessential', even my church. For shame. Might I add that even after every staff member or visitor had to be doubly vaccinated to enter the nursing home premises, as well as the vast majority of residents being 'vaccinated', they had wave after wave of outbreak. And since 3 vaccines were mandated, more waves of outbreaks. Highly effective this 'vaccine' is, right?. And may I mention the result of staff leaving (either being stood down or resigning due to the mandates) resulted in ridiculously inappropriate resident to staff ratio to this day. The quality of life has radically diminished. But that's a state government issue isn't it? Except it's not, there are federal run homes too.... but nothing to see here folks....

[REDACTED]

So much for informed consent. THIS IS WHAT YOU HAVE ALLOWED. You can blame it on the State Government but federal law and constitutional law overrides state law. And has been totally ignored. Cowardly, deceitful, lazy, rotten scoundrels.

In [REDACTED] 2021 my then [REDACTED]-year-old daughter experienced cardiac arrhythmia and chest pains after receiving one dose of Pfizer. The specialist recommended she not receive another. She was unable to get an exemption from having to receive a second dose of other options, and needed to work [REDACTED] (highly risky apparently) and so received a second dose of something else. Pfizer's 'vaccine' ALREADY had a reputation of causing myocarditis, which was verified after seeing the aftermath of massive vaccination rates in Israel. It was ignored. Will she be alright in the future? We don't know. But will she have redress? No. Indemnity to all, except those who wanted to retain their freedom, those are right wing extremists and must be monitored....

My son [REDACTED] years old, with a [REDACTED] condition was totally locked down and isolated with me, 2 weeks prior to [REDACTED] surgery (standard to [REDACTED]) at the [REDACTED] Hospital which went wrong due to a dangerous infection around one week post discharge. We could not enter the hospital and see him during that time, despite the dangerous situation. He was there for almost a month. He could have died alone. Whilst there, he was given the Pfizer 'vaccine', because he worked in [REDACTED] (outdoors, so apparently highly risky, right?). His [REDACTED] issues treated by medication instead. He was well until [REDACTED], we contracted Covid (he was doubly vaccinated at this time, so clearly it did not stop transmission or contraction, propaganda which you were still pushing despite lack of evidence). By [REDACTED] he was unwell [REDACTED]. A brief hospital admission did not help. By [REDACTED]. Were these caused by his change

of medication? Or undiagnosed myocarditis? We will never know. No one would be brave enough to even admit the possibility of vaccine related adverse effect. By [REDACTED] he was on the [REDACTED] transplant list.

Do you have any idea how this felt to us all? Do you have any idea how stressful all the restrictions were? Will you take any responsibility? No. You won't. This inquiry is just a thin veneer of caring, and let's all agree to the draconian pandemic treaty from the WHO with similar coercion and control to come.

Despite an exemption, the [REDACTED] hospital made it near impossible for me to visit my son who was slowly dying. So I received the Novavax. But unbeknownst to me, they had recently changed the visitor regulations, so being coerced into a medical procedure I never wanted and lost my job over was effectively useless. On [REDACTED] we got a call to say a donor [REDACTED] was available. My son had to be at the hospital virtually immediately. And they mentioned that the donor had Covid, did he still want the heart?

Please tell me why I was treated as a leprous villain for not wanting the Covid 'vaccine' and yet a heart from a donor with Covid was perfectly acceptable?

Do not misunderstand me. I am not complaining about the medical treatment and expertise from the [REDACTED] transplant team. I am in awe and will forever be grateful to the donor and their family for the priceless gift of this new [REDACTED]. The [REDACTED] transplant department is second to none in this country, and my family and I are all eternally grateful for this. But it's fair to ask the question about how logical were the 'vaccine' mandates and government decisions in light of our experience? Will anyone answer the question?

Due to government decisions during the pandemic [REDACTED] have had increased anxiety, depression. I cannot tell you the effect on [REDACTED] specifically as it's highly personal but what transpired because of lengthy periods of lockdown changed her forever and left her traumatised in a way no girl (or boy for that matter) should ever have to go through. Not one of [REDACTED] has been untouched by depression or anxiety during this time, 2 with official medical diagnoses.

Our [REDACTED] a paramedic with patient transport observing his clientele reported high incidences of teens, particularly girls, self-harming during the pandemic. He got so burnt out he is now incapable of work and suffering his own mental illness.

In [REDACTED], after a lengthy period of unemployment aside from some private work given by people who knew me personally and valued me more than my vaccination status, I got a new job in the [REDACTED]. I stated I'd had one dose of the Covid 'vaccine' on the application. They did not mention any vaccine conditions for employment either during the interview, follow up HR conversation, or after I sent them all my documents including my Covid 'vaccine' certificate. I signed all the paperwork on my first day, none of which outlined their Covid 'vaccine' policy. 5 weeks later (during which what I can honestly say was high productivity and professionalism in my work) the HR lady asked me for my other date. I told her there was only one, explaining this had been stated on the online application. They told me to work at home until they'd investigated the current law after I told them the mandates had changed in Victoria and did not apply in our context. With no other communication, one week later they sacked me, effective immediately, with less than an hour before knock off, with no explanation because "you are on probation and we don't legally need to give you one". Absolutely unconscionable.

Do you understand the effects of government decisions are ongoing? Can you really deflect all this to State Governments and take no responsibility?

So what's this submission for? Because I want to say I had my say, even though I have zero confidence in all but a small number of senators. They spoke for us, they will speak for us. Victoria has deteriorated in more ways than I can describe. Had the federal government done its job and upheld our constitutional rights this never would have happened. Shame on Victorian politicians (one in particular). But shame, shame on you.

[REDACTED] supposedly said 'evil prospers when good men do nothing'. I would add, evil prospers when bad men and women are the decision makers.

Are you either? If not, prove it.
