

Commonwealth Government Covid-19 Response Inquiry Submission

13/12/2023

This submission is taken largely from that submitted by [REDACTED] as I think he raised many significant issues that need to be addressed by the inquiry. He is for example correct when he states the following:

Referring to specific terms of reference he goes on:

Re. this

1. The refusal to allow Australian citizens to return home at the time of crisis cuts at the heart of citizenship and represents a shocking breach of faith with the Australian public.
2. The **National Cabinet** combining the executive branches of State and Federal government is a fiction, **has no basis in the Constitution**, and ..undermines the rule of law including our emergency laws which lay out the decision making process and transparency measures...designed to protect Australian people in moments exactly like these.
3. The Prime Minister **being permitted to give himself a plethora of Ministerial positions** with no one, including the Governor General, apparently objecting at all, sets a dangerous precedent ... and makes a mockery of the Westminster system we believe we live under.
4. The Federal Government **consenting by silence** to the border closures and other inhumane non-medical interventions, up to and including standing by as children died from lack of basic medical care as a result is a stain on our government and nation.
5. The Federal Government **consenting by silence** to State level mandates for an experimental gene therapy, violates human rights, breeched the Nuremberg Code and represent the Government assuming it has total power over every individual's body. The fact that government did not object in the strongest possible terms to the very notion of mandated medical experimentation speaks volumes and shows the importance of holding this inquiry.

And this

6. The dismissal, deriding *and then banning* of know, cheap, effective treatments which were then, and are *now Known without a doubt to reduce Covid-19 hospitalisations and deaths* when used early and in appropriate combinations, notably Hydroxychloroquine and Ivermectin in their respective triple therapies, represents an inversion of the medical regulatory system, where the system was used to create *Worse* health outcomes.
7. Given the known efficacy of Hydroxychloroquine in reducing Covid-19 hospitalisations and deaths the *seizing and destruction of a large quantity* of it brought into the country privately by Clive Palmer and donated to the public makes the Federal Government directly responsible for at least some of the Covid-19 deaths that occurred since.
8. The fact that the dismissal of known safe and effective treatments was a necessary pre-requisite to the emergency approval of the various novel mRNA based therapies because of the requirement that "there is no adequate, approved and available alternative to the product" calls into question the purported professional independence of the regulatory bodies who dismissed the proven therapies.
9. *AHPRA's threatening and harassing doctors who dissented with the governments stated position* on either Covid-19 known therapies such as HQC or Ivermectin or novel gene therapies such as the disastrous mRNA therapies represents the turning of the medical regulatory system AGAINST the People of Australia.
10. Federal Government's failure to ensure that the emergency-approved mRNA based therapies were assessed as the Genetically Modified Organism they are and complied with the relevant safety standards with *regards to pollutant DNA is a failure of duty of care* and has *already led to lawsuits* and may yet lead to considerable compensation payouts for those harmed by these unapproved GMO's
11. The fact that a motion to investigate *the extraordinary levels of excess deaths currently* being observed in Australia (and other highly vaccinated countries) was repeatedly defeated in Federal Parliament is yet another mark of SHAME that needs to be explained to the people of this country.

Finally,

1. By April 2020 it was known based on data from Italy, Sweden and Israel that Covid-19 was a high risk for elderly and infirm and as age dropped and health improved it became a negligible risk for the vast majority of the population. This *was never taken into account* in any of the non-medical interventions such as border closures and more.
2. Existing therapies known to be safe (multiple sources of irrefutable evidence, very early on) should never be banned from Australians. The *banning of Hydroxychloroquine and Ivermectin was a violation of the rights of Australians to access medical care*, a violation of the doctor-patient relationship that led to a loss of trust that will likely never be regained.
3. The withholding of any early treatment from people testing positive with Covid-19 may well have worsened their prognoses or even ultimately led to their death at the hands of hospitals applying inappropriate treatments at the wrong stages of their illness.
4. The Federal Government *should never be silent in the face of States violation of Australian Citizens Human Rights*.
5. Governments both State and Federal should be required to release all working information from meetings held at taxpayers' expense and during which decisions are taken that directly affect taxpayers.

6. Governments both State and Federal **must act in accordance with their respective constitutions and comply with all requirements of checks, balances and transparency.** The artificial construct known as “The National Cabinet” must be abandoned and minutes from the Covid era (at least) released in full.
7. As a matter of principle, ***NO GOVERNMENT in Australia , State or Federal should EVER BE ALLOWED to mandate medical procedures on its citizens.*** The believed safety, effectiveness or necessity of the intervention is completely irrelevant. When it comes to medicine ***Either you get FULL INFORMED CONSENT or YOU DON'T DO IT. NO Exceptions.*** Given that the package inserts for these mRNA experimental gene therapies were and apparently still are entirely blank... ***NO Australian who got the injections has EVER Given Informed Consent.***

There are many more issue to be raised and many people who need to be held accountable for their decisions and actions which led to the deaths and injury of significant numbers of Australians.

I truly hope this inquiry is allowed to be of consequence and not a mere 'tick in the box'.
