

Re: Commonwealth Government COVID-19 Response Inquiry

To Whom It May Concern

This seems to be a farcical exercise, seeing that the government has secretly only given the public one week to submit a response to the inquiry that will be held. It appears it will not assume accountability, but is merely seeking broader means to enforce their will upon the people.

The Covid era, which includes present times, has seen the government take extreme measures to extend and grant itself enormous powers - powers never given to them under any law in Australia or the Constitution of the Commonwealth of Australia, to make decisions that would alter lives forever, based on very scant information and not science. The use of violence and coercion against dissenters was unlawful to say the least – behaviour more evident in dictatorship realms than in a 'free and democratic' country. The government and media bombardment of false information was extreme, filled with lies and drowned in elitism.

Never before in the history of the world has the 'healthy' been asked to medicate for the sake of the elderly or infirm. Not only that but they were coerced into taking the jab despite it not having been tested for safety and effectiveness. Lies were told, yes, with the government telling all who would listen that the jabs were safe and effective. What a LIE! The government even enforced this jab mandate on pregnant women and babies. How disgusting and criminal!

Men and women were prevented from earning a living to provide for their families, and we have no clue as to how many marriages were shattered as a result, and how many people committed suicide because life was made impossible for them. The government kept families from each other with some silly 'border', conveniently forgetting that covid was an airborne sickness and the germs did not recognise these contrived man-made barriers. How ridiculous! History will mock these leaders and their assumed 'wisdom'.

The majority of children were excluded from their education. Parents who were scrambling to make ends meet somehow were forced to educate their children. The very parents who had entrusted the education of their children to the mighty government were hopelessly betrayed by the very people they trusted. Most children ended up playing games all day long, not engaging in any healthy physical, social, emotional or educational activities. Of course, the rich elites

were able to hire tutors or teachers to exclusively teach their children. They never missed a beat.

Thousands of businesses folded as a direct result of the covid excessive response to a relatively minor illness, from which most people recovered. With businesses gone, homes and lives were 'smashed and broken'. Criminal!

People died in old-aged homes and hospitals without their loved ones to give them some comfort. Heartless!

The government has covered up how many deaths have occurred as a result of the jabs enforced on people. Children, young people, generally healthy mid-forties-and-fifties-aged people, suddenly die in their tracks for no reason.

When will these criminals who posed as the government be brought to justice to be accountable for the deaths, pain, loss and hardships of the people they were meant to help and protect? I am not holding my breath with this inquiry. After all, you may slap the wrists of the federal government, but there is still the issue of each state government who were just as vicious and ruthless in the administration of their 'duties'.

Unless we learn genuine lessons from this exercise, we can never again call ourselves a 'democratic' or 'free' country, because as it stands today, we still bear the burden of mandates, violence and coercion in many areas of life. Human rights will be just a flicker of memory of what once was if we don't turn away from this madness of governmental overreach.

May God help you make wise decisions.
