

To whom it may concern,

I am writing this submission as a very concerned parent and teacher.

Firstly, I would like to thank you for the opportunity to do so and for your time in reading it. The sole intent is to highlight the facts behind my concerns, with the desired outcome seeing potential required solutions being implemented, so all Australian's can benefit in a future together to thrive in our personal health, moving forward.

- Governance including the role of the Commonwealth Government, responsibilities of state and territory governments, national governance mechanisms (such as National Cabinet, the National Coordination Mechanism and the Australian Health Protection Principal Committee) and advisory bodies supporting responses to COVID-19.
- Early treatment protocols by Dr [REDACTED] had already been established in the US, Australia did not take on board these practical common-sense treatments. Experienced doctors needed to be heard instead of being shut down in their opinions and expertise. Early treatment protocols could have saved many lives if implemented.
- Listening to immunologists, who were not compromised by and biased to government bodies or big pharma instead of ignoring them. Funding is given to the TGA by big pharma, therefore it is already compromised and biased in their approach. One method does not fit all Australian people. Vaccines should and need to be optional, not implemented by mandates or coercion of losing the human right to function in daily society. The Australian immunisation hand book clearly states that each person's vaccine status should be private and confidential. Big pharma were the only ones that financially benefited from this pandemic and future pandemic.
- Human rights were ignored, medical interventions were forced by vaccine mandates. Ethical treatment was destroyed highlighted by the fact people were sent home without any **anti-viral medication. Ivermectin and hydroxychloroquine Vit C, Vit D, Quercetin, Zinc** were not given as advice to people who supposedly tested positive. Doctors need to be free and allowed to treat each patient accordingly, as everybody's immune systems is different. Not all medical inventions suit all people, people need bodily autonomy, freedom of choice of what goes into their bodies, especially when the covid vaccines are under provisional use. An, experimental new technology MNRA that has never been used before in human beings.
- Australian Health Protection Principal Committee instilled coercion and did not speak against forced mandates. This medical body needed to advocate for people's health and respond ethically to human rights. The National Cabinet, the National Coordination Mechanism / Australian Health Protection Principal Committee needed to object mandates and support a non-biased approach. For people to have an open dialogue of pros and cons with their doctor.
- Belonging to the WHO, UN or big pharma, is not of any benefit for Australian and as Australians we did not vote these people in. People contacted lawyers during mandates and current mandates are still in place, to object vaccines, they quoted the Nuremberg code and our fair work response was "Australia does not abide by international law." So why is our current government still enforcing mandates and clearly in partnership with and abiding by international recommendation from WHO UN, big Pharma? For future pandemics we should learn that this is not ethical or morally correct as Australian citizens have not voted for any of the people in the international world i.e. WHO UN etc.
- APHRA's role is to consult with doctors, not to silence them in their personal relationship with their patients.
- Key health response measures (for example across COVID-19 vaccinations and treatments, key medical supplies such as personal protective equipment, quarantine facilities, and public health messaging).
- RAT tests and PCR test have never been 100% accurate as the covid virus has never been isolated. The medical professional continued to implement unnecessary tests. The inventor of the PCR test, Dr [REDACTED] PhD, quotes, **"Anyone can test positive for practically anything with a PCR test, if you run it long enough, with PCR if you do it well, you can find almost anything in anybody. It doesn't tell you that you're sick."** These tests were never accurate, so many people had false positives, having a wrong diagnosis. The medical board needed to consult and listen to the truth about these tests. People were locked into their homes, 14 days of isolation with negative PRC tests were still locked up because they were in close contact with someone who supposedly tested positive. The military visited people twice during the government-imposed lockdowns, doing random checks on those forced to quarantine. Children locked into their houses and despite whole families tested as negative on the PRC, they were still locked up.

- Children were not treated for whooping cough because they had a cough. Medical clinics refused to see our [REDACTED]. He tested negative but was still refused to be seen, even though all medical staff had been vaccinated and wore masks. My [REDACTED] and I were sent to a covid clinic. I was not allowed in unless I showed my vaccine status of two doses. Our [REDACTED] had [REDACTED], we had to wait in a 40-degree day outside the covid clinic, because no GP would see him. Our [REDACTED] did do a PCR test forced by the nurses at the covid clinic which gave him a [REDACTED]. The test was negative as well as another RAT given testing negative. All I wanted was his [REDACTED] to be heard, for signs of [REDACTED]. We were surrounded by positive cases of covid patients so this does not make sense and is completely unethical to force people to line up to get tested when surrounded by so many others also waiting, who may be covid-positive. These are crimes against humanity. Protective equipment, quarantine facilities, and the wrong public health messaging were false as PCR and RAT can not test for covid.
- Masks do not work therefore unnecessary funding/spending of millions on vaccines; protective gear did not protect us from getting covid. Masks are worn in surgeries for blood spills, masks are impossible to stop any virus because the droplets are so small and slip through any mask. The lack of oxygen to the brain is detrimental to people's thinking, focus skills and oxygen hydration levels. Masks were a waste of money and not effective. The medical industry knows this, covid virus as like the flu / cold and any virus can be caught through eyes, ears etc. Sick people get sick more easily, therefore educating people on building their immune system would have been a better approach. Fear was driven into the public which put our health system in an unnecessary panic and strain on staff, paramedics, hospitals and people's stress mental health, as people were going to the hospital with mild symptoms.
- Quarantine facilities was another waste of tax payers' money. Again, if medical board thoroughly did their research and read the documentation from vaccine trials, they would have known and most likely did know, that vaccines did not stop transmission. Again, Early Treatment protocols should have been used and only the people that displayed symptoms should have stay home to recover with anti-viral medication.
- Broader health supports for people impacted by COVID-19 and/or lockdowns (for example mental health and suicide prevention supports, and access to screening and other preventive health measures).
- The facts and statistics showed the high increase of domestic violence, peoples mental health, all increase due to lockdowns. Lockdowns were not effective and are against people's human rights and freedom of movement. And we need to learn from these major mistakes, so we can protect people's wellbeing, because this should be the Commonwealth Government's responsibility, as well as the, national governance mechanisms (such as National Cabinet, the National Coordination Mechanism and the Australian Health Protection Principal Committee) to ensure they support Australian citizens, who incidentally pay their salaries.
- Mandates were unnecessary as we knew from the science, that vaccines did not stop transmission or getting covid. If the medical industry was truly non biased and if the TGA did their job effectively, they should have spoken out honestly and told the public that these vaccines do not stop spread or getting covid. The fear narrative was highly pushed by National Cabinet, the National Coordination Mechanism and the Australian Health Protection Principal Committee), instead of implementing early treatment protocols which work very effectively. The main stream news TV and government leaders implemented fear, false evidence appearing real. Anyone who spoke differently, who were and are critical thinkers were censored and still are being censored. Social media censored and still are censoring links about the death toll, adverse reactions etc.
- Countries such as Bulgaria and other European countries did not implement lockdowns and they thrived.
- International policies to support Australians at home and abroad (including with regard to international border closures, and securing vaccine supply deals with international partners for domestic use in Australia).
- Vaccine supply border closure has damaged our economy and society's health. There is a shortage of essential medicines, HRT hormone replacement therapy for women is in major shortage. I called the TGA and they 'blamed' it on covid. It is the TGA's / government's responsibility to ensure essential medication is in abundant supply for tax payers first, as a priority.
- All Australian citizens should have been welcomed home from travelling abroad and only isolate if they'd shown symptoms. Again, early treatment protocols implemented for people showing cold symptoms would have saved lives and money on unnecessary vaccine roll outs.
- Support for industry and businesses (for example responding to supply chain and transport issues, addressing labour shortages, and support for specific industries).

- We should not be relying on overseas supplies. We need to learn from this and establish better supplies for Australian's and support small business. Lockdowns have and are still causing (after-effects) suffering. Australia needs to be more self-sufficient in all industries within its own country.
 - If we did not have lockdowns the government did not have to pay businesses or people paid from isolating.
 - The Albanese Labor Government has committed \$100 million in taxpayer funds to the World Health Organisation, despite cost-of-living crisis facing most Australians and the WHO's appalling track record during the pandemic. This money should be going towards Australian citizens.
 - Foreign Affairs Minister Penny Wong announced a funding package at the UN General Assembly, following a convention debate in the area of Pandemic Prevention, Preparedness, and Response (PPPR). Again, more unnecessary funds going overseas, these overseas bodies are not voted by Australian people yet our 'elected leaders are readily submitting to unelected entities.
 - The Albanese Government is providing \$75 million in funding over five years to the WHO and a further \$25 million for the WHO's Health Emergencies Programme. "COVID-19 demonstrated that global challenges require collective action," Minister Wong said in a statement. Collective dialogue should be with Australian people only.
- Financial support for individuals (including income support payments).
- Misuse of funds, we did not need income support payments, people who were paid less in their regularly jobs were earning more and people also manipulated the system. Again, vaccines costed millions without proper investigation. If documents had been read, the risks and effectiveness would and should have been communicated throughout the public, to ensure true safety. These were a waste of money instead of implementing early treatment and providing already safe and effective drugs that have been in use for over 65 years i.e. Ivermectin. A cheaper alternative, however, these were ignored because no money would have been made on this.
- Community supports (across early childhood education and care, higher education, housing and homelessness measures, family and domestic violence measures in areas of Commonwealth Government responsibility).
- Early treatment and allowing doctors to treat in their own personal manner with safe and effective drugs already in use for over 65years such as ivermectin, and hydroxychloroquine. Education to the public on common sense measures around supplements VIT C, D, zinc etc. which enhance the immune system. Educating the public, on nutrition garlic / ginger which are, anti-inflammatory foods etc. Therefore no one should have or needed to be locked up in their homes, or home schooling.
 - Locking up the elderly in a small room for 10days is a crime to humanity not be able to see their loved ones, or people not allowed to see their dying family members in hospitals. Again, adding to people's mental health, as we all know that when people are in fight or flight in high stress, their immune systems are compromised.
- Mechanisms to better target future responses to the needs of particular populations (including across genders, age groups, socio-economic status, geographic location, people with disability, First Nations peoples and communities and people from culturally and linguistically diverse communities).
- Regardless of gender, age groups, socio-economic status, geographic location, people with disability, First Nations peoples and communities, people from culturally and linguistically diverse communities, this point is unhelpful as WE are all human beings. All Australians deserved early treatment and safe and existing drugs that worked.
 - Scientists that are non-biased to big pharma, should have been allowed a platform to speak on the media and the government bodies should have encouraged this. Open discussions are initial for freedom of speech of supposedly living in a democracy. Facebook, community website, YouTube, google were all censored, if anyone spoke about alternative treatments, they were shut down, doctors' licenses were suspended and the government sadly gave misinformation and disinformation on vaccine safety.

*Please refer to attached documents as evidence, website statistics.

Thank you for taking the time to read this submission, and the future of our country is vitally important so let us learn from the many past mistakes during covid. Because we need to re-establish human rights, freedom, democracy, drop mandates and fear narratives, respect people's bodily autonomy, for people to have the right to choose NO for any future vaccines.

People who said NO to these provisional use, experimental vaccines, are the ones who survived death and adverse reactions, and long-term side effects, being a critical thinker and questioning things is a human right.
