

## NOTES FROM VIDEO WITH THE ECHO CHAMBER AND WARRIOR AT LAW

### QUESTIONS TO ASK YOUR EMPLOYER - IN RELATION TO VACCINE/GENE THERAPY MANDATES

- Do you have proof of receipt of service of a Public Health Order or Biosecurity Control Order with my name on it?
- Did you receive a Public Health Order or Biosecurity Control Order recently that is personally and individually addressed to the business or yourself? If so, where in that order did it confer the powers of authority for the employer to enforce this?

### NOTES

- Commonwealth and Crown Officials and Officers are the only people allowed to enforce the mandates. If my employer is not a Crown Official or Officer, there are massive penalties for acting as or impersonating a Commonwealth Crown Official or Officer as per the *Crimes Act 1914* which is Commonwealth legislation and covers the entire country.
- Laws in Australia are made via an act of Parliament - not by media releases or politicians. How did this become a law? If it wasn't an act of parliament, it's not a law.
- Our rights are only lost when we voluntarily give them up. We are currently trading our rights voluntarily for privileges.
- There are other choices and options - just because they're not offered, doesn't mean they're not there.
- Employers are being offered big incentives to mandate and some being threatened fines to not. They're also in a tricky situation.
- Aged care industry losing staff rapidly - businesses on all levels being affected as well
- Businesses who are not on the list of 'being required' to mandate jobs are locking out unvaccinated because they are filled with fear. Take your business elsewhere. Money talks so spend it elsewhere. Who is not enforcing this tyranny? Let's support them. Drive 30 minutes to a café in order to support them. Detach from your old life if you truly want to stand in your sovereignty. If you want to see change, you're going to have to make uncomfortable changes. The comfort zone is dead - we need rapid change, now. Look at what we're fighting for, not what we're fighting against.

- Refugees are moving back to their war torn countries. They feel safer there than they do here now. They see what the Government is currently doing. They've seen it happen over there and they're watching happen in Australia.
- Isn't it illegal to advertise vaccines on TV? Are the Government the only ones allowed to do that?
- Have you been called a conspiracy theorist? Apparently you are still a conspiracy theorist if you're not supportive of the passports and mandates. How did we just ignore the fact that the conspiracy theories are not actually conspiracy and they've come true?
- The Government need the people to comply for this to work. There's 2 ways this can go - potentially a rebellion looming? Or enough people stand up and the Government starts to do their job and serve the people.
- Many fines are not holding up in court. These mandates are not law. For laws to pass, they need to go through both the Lower and Upper Houses of Parliament. Queensland has not had an Upper House in Parliament since 1922.
- Many people will take a convenient lie over an inconvenient truth. People are in denial. They're scared.
- The boosters will continue with no end in sight
- There are now TV advertisements like 'sticky blood' for smokers and myocarditis in children as part of the conditioning process to wipe the fact that reactions ARE happening.
- More and more people are waking up - FOCUS on this. Have faith. Embody that.
- Some businesses have copped some fines for standing up and threatened to be shut down. But a public health order must be in writing and it must name the person who it is for. Have you met anyone in Australia who is in receipt of a Public Health Order or Biosecurity Order with his or her name on it?
- Go to Warrior at Law website - know your rights and know what you can do. The Government is counting on you to comply. Humanity is counting on you to stand up.
- Someone recently contacted their local MP to see their vaccination status and the response was that this was private information protected under *Human Rights Act Article 8*. If that protects them, it protects all of us. We are all equal before the law.
- Media releases DO NOT create the law
- The media lie - a woman in the Northern Territory heard the Health Minister on the radio saying "anyone over the age of 5 years old is not going to be able to leave the NT unless they've had the jab". This woman is not from the NT so she immediately thought she needed to pack her family up and leave. However, she questioned it and rang the radio station directly and asked for the source of information for that. They called her back one hour later and admitted that it was **not true**.

- What's more important to you? Copping a fine that you've got a massive chance of **not** having to pay when it goes to court, or your freedoms and rights? Get off your knees.
- We've got some amazing police officers who have been stood down who would not enforce this nonsense. Look up Cops for Covid Truth. There are other amazing officers still working and trying to do the right thing on the job. Again, it's not what we're fighting against - it's what we're fighting for. Pick your battles. It's okay to lose the odd battle.
- If you can look at the absolute nonsense of these 'rules and mandates' and have a giggle about it, it'll get rid of the fear. Keep a light heart e.g. unvaccinated must sit down and drink however if you're vaccinated you can stand up and drink in a pub.
- United we stand. We've got nothing when we are divided. Whether you're for or against this vaccine, it doesn't matter. This is about the right to choose, free of coercion. This isn't about vaccinated versus unvaccinated. NO matter which side of the fence of the vaccine issue you sit on, it's not about that. It's about our rights, freedoms and choice. When does it stop? How much hurt and pain does Australia have to go through before we turn around and stand up?
- Will you be able to look into your grandchildren's eyes in 20 years time and tell them that you took a stand and did everything you could? What will we tell the future generations? What legacy are we leaving behind if we don't do something? It's scary as heck. But we can do this.
- "She'll be right?" She's not right at the moment. It's time to take a stand.

## Liability

Big Pharma, doctors and nurses administering vaccine/gene therapy are exempt from liability for damages. Liability goes on the employer - even if you were no longer employed by the company, if you were vaccinated/jabbed while employed, employer is still liable

## Breach of work contract

- If you have an employment contract and the contract doesn't mention that you are required to have a vaccine to perform your job, this is now a breach of contract. Employers are liable for breach of contract - for some people there is no end date on the contract. The Fair Work Commission has pay outs capped at \$30 000 or \$50 000 in some cases. Fair Work Commission payouts are going to take time.
- **Do not quit** your job - this means you absolve the contract. Ensure that employers let you go.
- It is not entirely legal to be forced to take your annual or sick leave when stood down.
- If it's not in the contract, the employer cannot enforce it without breaching contract

## **If you're going to lose your job if you refuse the jab, where do you go?**

People are being told to go to the Fair Work Commission (currently inundated) or Human Rights Commission (no one at the captain of the ship - job position has been vacant for months and won't be filled until late November 2021).

## **What about showing your vaccine records?**

This is your personal and private medical information. You are not required to show that to anyone other than your doctor. They do not have authority to enforce this or see your private medical records, as they are not Commonwealth Crown Officials and Officers.

Employers are **asking employees to voluntarily** provide vaccine certificates because they would be in breach of Privacy Laws. It is a breach of the *Privacy Act 1988*, *Disability Discrimination Act 1992*, *Declaration of Human Rights*, *Constitution of Commonwealth of Australia 51.23 and 81.09* and *Commonwealth Crimes Act 1914*.

## **Religious Exemptions**

- *Commonwealth Constitution Section 116* states that the Government is not allowed to place an observance as a requirements upon your religious beliefs -
- Regardless of how others see it, that is one of our basic human rights to have our own religion
