

## Covid 19 Response Inquiry

In my view and experience, the response to the Covid-19 pandemic was a disaster.

The vaccines were experimental, unproven for either safety or efficacy.

Our TGA failed to do independent tests and it is now scientifically proven that the mRNA technology contains GMO substances that were not disclosed.

While the message was "its safe and effective" and claimed to be based on "science" this is demonstrably untrue. The inquiry terms must be allow questioning of government and health officials!

Why are the vaccine suppliers immune from prosecution?

Why were government officials exempt?

Why were the Pfizer trials not released.

Disclose the supply contracts.

Provide the science behind the PCR test.
