

I [REDACTED] of [REDACTED] state as follows:-

1. At the time of my vaccine injury (December, 2021), I was [REDACTED] years old. I had suffered a [REDACTED] injury 20 years prior but was a successful owner operator of an [REDACTED] business.
2. During the covid pandemic, it became evident that I could not conduct my business without having received the vaccine. I couldn't enter retirement villages or shopping centres without it.
3. 3 weeks after my 2nd Pfizer vaccine, I felt unwell and began experiencing stroke like symptoms. Soon after I was admitted to the [REDACTED] Hospital, I was diagnosed with a TIA, heart palpitations, and heart arrhythmia. It was told to me at the time that the covid vaccine was the likely contributor.
4. Since that time, I have been taking what I now know will be lifelong medication to manage my heart.
5. Up until the time of the covid vaccine, I was an otherwise healthy [REDACTED] yo male who ran his own business. As a result of the TIA, I experienced further cognitive decline and the worsening of previous non-serious underlying health conditions. Because of the nature of the covid vaccine and the health system, I feel everything was downplayed.
6. I truly regret receiving the covid vaccine and believe that the government should have protected people like myself by providing further information/warnings about the possibility (however small) of underlying health conditions worsening with the vaccine or at least that there would be no guarantees that further health complications may arise as the vaccine was untested.
7. [REDACTED] who was [REDACTED] yo at the time of her vaccine injury also had major health complications after just one vaccine reacted with her adversely. The hospital at the time attributed it to the vaccine and she has experienced ongoing health issues ever since. Being diagnosed with MAST cell activation and a plethora of health conditions she has had to cease work in her [REDACTED] business which is what she absolutely loved and lived for. I know that there are hundreds of thousands of young people just like her who have become disabled by the vaccine activating underlying health conditions.
8. The government now has a duty of care to ensure that the community is never mandated again to receive a vaccine which is otherwise untested, particularly on young bodies.
9. I never wish to see this page in history repeated.

Dated at [REDACTED] this 14th day of December, 2023

Regards

[REDACTED]
