

Where is the transparency in our government? The total number of excess deaths in Australia attributed to the Covid-19 (novel) vaccines needs to be determined and the chilling results released to the public. If this data is not revealed to the Australian people, we cannot put our trust in our Government going forward.

This is a HUMAN RIGHTS **issue** and we, the people of Australia have had our human rights infringed upon **en-masse** by the coercion and dictacts of the Morrison and Albanese Australian Governments since 2020 to this day.

Covid-19 health alternatives taken off the pharmacy shelves by the Government.

It has now been realized that affordable non-prescriptive Ivermectin and Hydroxychloroquine drugs could have been used effectively to assist the symptoms of the Covid-19 virus. Our Government is responsible for having these effective drugs taken off the pharmacy shelves so that people could not acquire health alternatives to the vaccine being mandated by the leaders and officials of this country.

Misinformation Campaign

Initially, the Scott Morrison Government issued false-facts about the Covid-19 virus and then mandated a 'pandemic response' which was disastrous to the Australian people on so many levels, it was destructive to our economy, to our social norms and structure. The now Albanese Government continues to spread misinformation about the so-called vaccine as it continues to offer and encourage Australians to accept more boosters. Even to this day, vaccine mandates are still in place in the workforce for some employees. This is outrageous given that the lies about the vaccines safety and efficacy are now there no for all in our country to see.

Those elected Governmental officials, as well as the unelected Health Officials, Public Servants and Ministerial Advisors should be investigated for their involvement in the misinformation campaign released on the Australian public, which led to the creation of fear and compliance of their dictates. The data about excess deaths relating to the Covid-19 vaccine should be analyzed, correlated, and conclusions released to the public in a timely way. In addition, those officials who were involved in coercing the public to have the shot with their mistruths and falsities should be held personally to account for their respective decision and the deaths and violations of human rights that ensued therein.
