

It is difficult to explain the depth and complexity of the Covid -19 response on myself and my family, indeed, the entirety of humankind. However, the evidence speaks for itself. Here is a brief list from a multitude of evidence available that perhaps demonstrates some of the impacts of the global 'lockstep' Covid response and the need for an urgent Royal Commission.

- 1) mRNA vaccination was and continues to be experimental, and we were the testing animals

It is essential that government realise the connection between the Covid-19 response and the global agenda to control humanity. It is a complex plan that interweaves aspects of social transformation, biodigital convergence, digital surveillance, climate change action, 'SMART', sensor and nano technologies, DNA data hacking, and a world artificial intelligence system of total control over every aspect of life on earth.

Government must take this evidence seriously and reach the inevitable conclusion that life on earth is at imminent risk as a direct result of the continued development of biological weapons ('vaccines') and connected digital frameworks. All gene related experimentation must cease immediately. It is imperative to hold an urgent Royal Commission.
