

Covid-19 Response Inquiry

I am a wife; and a mother to [REDACTED] I am in my [REDACTED] Individually, and as a family, every aspect of our lives were negatively affected by the handling of covid - by the mandates, lockdowns, mask wearing, limitations on travel, etc.

The mandating of covid-19 “vaccinations” was draconian and totally mismanaged. There were no short or long term data on the “vaccine” use, the information given kept changing, and our rights to make our own informed decisions on medical issues were trashed. As a result of our concerns, we did not get vaccinated.

My [REDACTED] and [REDACTED] all lost their jobs. The way they were treated by their employers was not nice. Each received varying degrees of harassment and bullying. In my [REDACTED] case he was told he would lose entitlements if he did not resign. My [REDACTED] was actually on long service leave when he was sacked, losing his yearly bonus. We all suffered financially. Our plans for transitioning to retirement were destroyed when we had to withdraw superannuation early just to survive.

The unvaccinated became a target. We were called granny killers. The hosts of Sunrise morning show said don't allow the unvaccinated to your place for Christmas. The then premier of NSW said she didn't want to stand next to an unvaccinated person. Calls to limit an unvaccinated person's access to medical treatment were made. We were called all sorts of names. We were ostracised.

The lockdowns, border closures, etc limited our ability to visit family members (eg our [REDACTED] interstate); to buy food, to exercise, to socialise, to work.

We have family and friends who followed the official advise and have suffered illness, injury and in some cases death as a result of the “vaccinations”.

We now question any advise and information from the governments, health authorities, media, ATAGI, ARPHRA, and even our own local doctors.

Health and non-health response

The Commonwealth, state and territory governments, the National Cabinet, health departments, the media, big corporations and bodies like ATAGI and

AHPRA have devastated Australia and Australians either by design or neglect of their responsibilities.

To name a few issues and solutions:-

- *Statistics*. Died “with” must not be grouped with died “from”. This inflated death rates. Statistics were ignored or skewed to fit an agenda. We need the statistics to be true, honest and transparent.
- *AHPRA*. AHPRA must be held accountable for their treatment of medical professionals and of their de-registering of those who expressed alternative views. By what authority did AHPRA have the power to do what they did?
- *Doctor / patient relationship*. Medical professionals must be allowed to treat their patient as befits their condition. It must be a private and confident matter between the doctor and patient.
- *Lockdowns*. People must not be locked up. The harm caused by the lockdowns exceeded any perceived benefit. Health, fitness, socialisation, etc should be promoted.
- *Media*. Journalists must be able to report the news, not be tied down to the official line of governments, the media owners and big investors like the drug companies. The media pushed an agenda, pedalled fear and created a hatred against unvaccinated people. Conflicts of interest must be disclosed, eg who provides the funding to the media organisations.
- *Politicians*. Politicians must be held to a higher standard. The name calling and abuse of the unvaccinated was appalling. There was a big show of wearing mask while giving interviews, then taking the masks off as soon as the cameras stop rolling. They peddled fear by giving constant covid updates, using skewed statistics and making outrageous claims.
- *Police*. The police force must never be used against Australians and their right to peaceful protest. The heads of the police forces must be held accountable for their actions in ordering the use of excessive force and intimidation. There are also individual police who went to extremes. All must be held accountable.

Responsibility of the Commonwealth government and the role of state and territory governments

The Commonwealth government allowed the state and territory governments to behave like their own sovereign entities with their own draconian edicts, like closing state borders. Australia was divided. People could not travel to see sick, aged and dying family members and friends. Vulnerable people were left to suffer on their own. People who traveled interstate for work were forced to choose between providing for their family and actually being with their family. Every aspect of Australian life was negatively impacted.

National governance arrangements and the National Cabinet

The National Cabinet was an unnecessary and secretive entity with too much power in the hands of a few. We have a Commonwealth government who was equipped to oversee the covid “pandemic”.

Overall the Commonwealth, state and territory governments went on power trips, destroying not only our democracy but every aspect of our society, economy, and the basic fabric of what we are as Australians.

In summary

The Commonwealth, state and territory governments; along with health advisers, health departments, the media, corporations, ATAGI, AHPRA and other entities need close scrutiny to see where conflicts of interest lay; where there was mismanagement and abuse of power; where Australian laws were broken. What was done to the Australian people was uncalled for and devastating. Alternate views to the official line were not tolerated. Still the vaccine injured are being ignored. The increase in deaths and “turbo” diseases are ignored. There appears to be little to no attempt to get to the truth.

Australia and the Australian people have suffered. We are doomed to go through the same again if true and honest investigations are not made and entities and individuals are not held accountable for their actions.
