

## Covid 19 Response Inquiry

I wish to submit my views to support a full inquiry into the Covid 19 response.

1. Vaccine contracts should have been disclosed to the public including evidence of trial results by any participating pharmacy companies. [REDACTED] was forced by the court of law to reveal information – this should be automatic. Any politician with any interests in any vaccination or association with same should be made public eg [REDACTED] I believe has a relative who was involved in contact tracing. [REDACTED] was adviser to [REDACTED]
2. Evidence was produced by many specialists in the field of vaccinations from around the world that the vaccinations were causing harm – World council for health sent a letter with evidence and information to many leaders globally including our government here in Australia to CEASE TO VACCINATE. Other specialist such as Dr [REDACTED] and many others raised concerns and yet they were silenced or ignored. Evidence based on science and specialists should be presented and debated. So, while we were mandated, locked down, masked up the politicians here were except from covid vaccinations Each state premier could dictate, make their own rules and decide what was acceptable for the community- no basis for their decisions as health advisors were not considering any global evidence that it was causing harm.
3. APHRA ran their agenda on silencing those practitioners that did not agree on the vaccination for their patience. Doctors take an oath to protect their patients and have a duty of care to provide the best outcome -they have the history the experience and knowledge to assist their patients in deciding to vaccinate or not. APHRA should not be given the power to override the decision making of a medical practitioner.
4. Blocking of information which the government regards as incorrect should be investigated especially if the source comes from those specializing in the field of vaccination. Australia should not be part of the WHO or should sign any treaty with same. We are a democratic country and the WHO giving advice through Covid was incorrect and they changed their protocol many times. We need to exit the WHO completely.
5. Vaccine protocol takes 6-10 years to produce yet this was rushed through without evidence of safety or efficiency and the results of the excess deaths and the adverse effects the covid 19 vaccination had is being seen today.
6. Alternatives to the covid vaccination were available and Dr [REDACTED] saved many lives using ivermectin. TGA stopped the use of ivermectin which had been on the market for 45 years – The government should investigate other measures that can assist is preventing covid or assist in recovery. I had a script for my [REDACTED] yet I was not allowed to fill the script- The TGA put a stop to anyone with a script for Ivermectin and medical practitioners were prevented from advocating same.
7. We need a full inquiry into all aspects of the covid 19 vaccinations. It destroyed families, it has created harm and adverse effects and it has contributed to our excess deaths as evidence has shown by many qualified here and overseas. Our TGA APHRA should be part of the investigation as well as the premiers prime minister at the time and any other authority who advocated false information and imposed rules on the community that were not justified.
