

Dear PM and Cabinet Members.

I write as a very concerned Australian citizen.

I request that there be a full, open, honest and wide-ranging inquiry via a royal commission, into the impact of the Australian and state government responses to the Covid vaccine pandemic. This inquiry must be undertaken by independent experts from a wide field of experience.

This is urgently needed.

This needs to include:

- the indemnity given to pharmaceutical companies re the cv vaccine
- the fact that each vaccine did not undergo standard long-term clinical trial data outcomes
- the true number of deaths as a result of the Covid Vaccine (TGA only publicly admits to 14 deaths, but this is not the true number in their own database)
- the true number of vax injuries
- statistics of different vax injuries
- vaccine mandates
- the silencing of doctors and the fear of punishment and reprisal through censorship and oppression by both AHPRA and ATAGI
- media censorship
- blackmailing of the population through forced vaccines to keep their jobs
- the consequences of lockdowns
- the closing of state borders
- the secret national cabinet meetings
- the impact on mental health across society
- the ongoing impact of forced school closures on student's mental health and the documented deteriorating academic performance
- the constant fear messaging and pressure by all government departments throughout the pandemic

Why my concern?

- I personally know many people who have been permanently injured by the C-vaccines
- I personally know of previously healthy people who have serious health issues that appeared suddenly after the C-vaccine was given
- This includes serious ongoing heart issues; lung issues; breast cancer; prostate cancer; melanomas and debilitating neurological disorders etc
- I personally know of many people whose employment was unacceptably terminated by their employer
- I personally know of people who were not reinstated once the mandates were lifted, such was the stigma associated with not being vaxxed
- I hear many stories similar to this in talking to family and friends

I see the consequences of all the above-

- the devastation of the economy due to shut down of businesses and resulting permanent closure of many businesses
- the subsequent loss of jobs, productivity and businesses, still happening post pandemic today
- the loss of jobs leading to loss of income, loss of businesses and loss of homes
- the resultant increased homeless-ness across Australia

We now have:

- a crisis in our health systems through lack of sufficient staff because the mandates forced many out
- a crisis in our policing numbers for the same reason
- a crisis in the education system for the same reason
- a crisis seen in increased ambulance ramping at our hospitals as a result of reduced staff
- the above crises as a consequence of termination of employment and failure to reinstate public servants
- a crisis of increased homeless-ness

- a coming crisis in the downturn in our economy

A full, open, honest and wide-ranging inquiry is need by independent experts to address these very serious issues of mis-management by the federal and state governments, during the pandemic.

This is urgently needed.

Failure to do this may indicate a serious cover-up.

Yours sincerely
