

Introduction:

Dorothy Johnstone, Mrs.
Address: Victoria

Re: Covid-19 Response Inquiry – Submission

Impacted by the following

ALL CAUSED BY CORRUPT INDIVIDUALS IN GOVERNMENTS ALLOWING UNTESTED VACCINES TO BE IMPLEMENTED UNDER ILLEGAL MANDATES

-illegal mandates and total lack of respect for the law in relation to freedom – international, national (e.g. borders were restricted), being in locked for years by a tyrannical leader – at one point unable to travel more than 5 kilometres without so called permission, the constant barrage of lies in the media and online by so called health professionals and politicians creating fear in people and the pushing of masks. I am a level headed person, in my 60's, but twice broke out in a sweat in Coles in a mild panic attack as I felt my breathing was restricted.

- the overriding of rights – e.g. the right to refuse vaccinations based on religious beliefs, personal opinion, or medical reasons. I am a healthy individual, and did not want to comply with an untested vaccine

-loss of employment for refusing to be vaccinated. I have still not been able to work in my chosen profession of Case Management for Home Care Packages due to companies following outrageous policies for so called compliance. This has substantially affected my earning capacity even now, which has affected my husband and myself and my family

-the inability to access services due to refusing to be vaccinated whilst the ridiculous mandates were on – the unvaccinated weren't even allowed to go to the hairdresser! We couldn't do simple things like enter a restaurant!

-the loss of privacy – people in positions asking if you are vaccinated that have no authority other than the illegal mandates

-the sense of insanity in the population for not listening to the voices of reason – censorship contributed to this. Those censoring concerns raised about these illegal demands for so called vaccinations need to be held accountable at every level

-those who have refused to be vaccinated are mostly still unemployed – organizational policies requesting vaccination need to change quickly

ISSUES I AM CONCERNED ABOUT

1. Australian Sovereignty needs to rule. Individuals who illegally and unjustly dominate others should be removed, and their assets seized. Laws need to be put in place to ensure what happened never happens again, and every agreement with external international bodies such as WHO need to be revoked

2. A database should be established of every person who has been 'vaccinated', and general public information provided as to the health issues and death rate for every batch
3. Research should be done as to the treatment for individuals who have died in hospital – the money trail should be followed, especially where following the so called [REDACTED]
4. It needs to be explained to the population why effective treatments were demonised and withheld. Access should be enabled to those treatments as a matter of urgency
5. Every person who has been vaccinated should have access to their individual information about the 'vaccine' that they received, with potential effects
6. A database collecting information via survey research questionnaires should be accessible to the public to enable unrecorded information and side effects
7. Urgent research needs to be conducted by honest researchers – especially the ones speaking out against the illegal 'vaccines' for effective treatments to override the effects – e.g. how has DNA been affected and how can corruptions to DNA be removed safely, how to improve the known health effects such as heart issues, reproductive issues, brain fog, cancer, etc
8. EVERY organization requiring employees to be 'vaccinated' should be investigated. Did they receive money, and if so, how much money did they receive for each employee? These organizations need to be exposed, and employees compensated.
9. **URGENTLY, RIGHT NOW** – every organization needs to have ANY demand for vaccination made illegal, including e.g. flu vaccinations, childhood vaccinations, etc.
10. Where the judiciary supported and ruled in favour of vaccinations in Australia there should be accountability. Positions should be lost, and the law should be imposed on their false opinions– IF they have not been vaccinated themselves, they have proven themselves to be corrupt already
11. ALL companies producing these vaccinations should be held accountable for misleading information, and their profits should be removed and redistributed to affected individuals
12. APHRA needs to be investigated, and thrown out as a standard for registration. Links with corrupt officials need to be exposed. HONEST medical professionals who have lost their jobs need to be invited back to employment in their chosen professional, and they should be compensated for their loss of income
13. ALL politicians pushing the vaccines should be publicly identified and held accountable at every level – were they vaccinated themselves? Any money trails need to be investigated and exposed, and forfeited!
14. The media itself needs a thorough overhaul. Repressing the truth should be illegal. Laws need to change in this area quickly. **ADS ADVERTISING 'VACCINES' NEED TO BE REMOVED.**
MEDIA SHOULD BE TELLING THE TRUTH TO THE POPULATION ABOUT SIDE EFFECTS!!!
