

My recommendations:

- Don't take advice from the WHO-

They gave misleading and conflicting advice. Stick to our own pandemic plan

- The TGA should be disbanded-

95% funding from the pharmaceutical companies is a conflict of interest.

Alternative treatments for Covid 19 should never have been restricted

- Get rid of APHRA -

For silencing doctors and interfering in the doctor patient relationship

For not allowing informed consent

- Have a Royal Commission into the Pandemic response

Why is the excess mortality rate still high after all the interventions, such as masking, lockdowns and vaccinations?
