

Dear participants into the Commonwealth Government's response to COVID 19,

My name is margareta toohey and I used to be an inhome aged carer.

From 25th of October 2021 from one day to the next I was unable to continue work that I absolutely loved, and which was an important contribution to the wellbeing of my elderly clients.

I remember the absolute fear inducing barrage from all media outlets that was unrelenting and driving everyone towards vaccination as the only solution. No other health measures were even considered. Needless to point out the short time the experimental gene therapy was approved.

Doctors that dared to go against the main narrative were severely impacted by either suspension or threat of being struck off the register.

Whatever has happened to informed consent, bodily integrity and freedom of choice for a greater good that as it turned out, increased an all-course mortality since 2021 by 16% as could be ascertained by the Government's own Health Department's website if you were lucky and patient enough to find the relevant data.

As part of an art initiative, I had the opportunity/misfortune to read the stories of nearly 600 wo/men who showed devastating medical symptoms shortly after receiving the COVID mRNA vaccine that was supposed to be safe and effective!

Data from all countries' health departments show the devastating effect these injections have had on a large amount of people.

The elderly should have been protected, the young and healthy who's risk of dying from COVID was minute, should have just gone on with their lives instead of lockdowns, divisions in families and friends.

The mental health fallout, the isolation, separation and division from the last three years has not even been fully realised yet.

I urge this committee to urge the government of the day to implement tailor made strategies that are relevant to the Australian people instead of taking the recommendations of unelected bureaucrats as the only guidelines without critical analysis of the implications of such decisions on the wider populus.

Thank you for your time.

Yours sincerely

margareta toohey
