

# **Submission to the Commonwealth Government COVID-19 Response Inquiry Panel**

## **Personal introduction**

I am writing to support the demand for a Royal Commission into the Coalition and Labor federal governments' mismanagement of the so-called 'COVID-19 response' as the most responsible outcome of the Panel's investigation owing to the nation to avert such indefensible and punishing measures being inflicted on the Australian public ever again.

I have been a teacher in adult education for more than 30 years and have been working in the tertiary sector for over twelve. I have a Master of Applied Linguistics from Macquarie University and a PhD in Medicine (Psychiatry) from the University of Adelaide. I support the activities of non-government organisations and volunteer community groups in raising public awareness of social justice issues.

## **Submission**

I submit that the following list comprises violations committed by one or both the federal governments against the Australian electorate:

- Unprecedented imposition of societal lockdowns, which contradicts the Australian Health Management Plan for Pandemic Influenza (2019) in which no such draconian measures are mentioned.
- Severely limited access to primary and secondary education for children and tertiary education for adults, with documented harm to childhood cognitive and emotional development.
- Groundless health information promulgated concerning masking and 'social distancing', neither of which have any validated support from the research literature.
- Failure to promote the targeted protection of those most at risk – the elderly and vulnerable.
- Total exclusion or strict restriction of families visiting terminally or acutely ill patients in hospitals or aged care settings.
- Institutional denial of the benefits of early intervention treatments such as ivermectin and hydroxychloroquine and denial of access to these medications.
- Human clinical trial of an experimental modified RNA gene therapy injection with no adequate safety or efficacy data.
- Legal immunity granted to pharmaceutical companies manufacturing the COVID-19 injectable product.
- Trashing of the Australian economy that may take at least a decade from which to recover.
- Corrupt funding of media corporations to promulgate a campaign aimed to escalate widespread panic rather than instil calm.
- Intimidation and censoring of doctors and healthcare professionals by AHPRA and ATAGI with threats concerning disciplinary action or loss of licences for deviating from or challenging the official narrative.
- Violation of the private doctor-patient relationship founded from time immemorial on the doctor's clinical expertise and judgement.
- Cancellation of all ANZAC Day commemorations in 2020 and the imposition of stringent restrictions in 2021.

- Prohibition of public attendance of Easter and Christmas church services in 2020, and the imposition of stringent restrictions in 2021.
- Destruction of small and middle businesses as a result of lockdowns while large corporations thrived.
- Arbitrary designation of services as 'essential' versus 'non-essential'
- False information given concerning the safety and efficacy of an experimental modified RNA injectable product.
- Misrepresentation of increasing reports of severe adverse reactions as 'rare' or 'mild'.
- Failure to financially compensate and support people suffering from severe adverse reactions.
- Failure to condemn the weaponization of the 'vaccine' as a mandatory measure used to discriminate against people unwilling to give their informed consent to having their bodily sovereignty violated.
- Deployment of federal police to shoot, assault, harass, and arrest members of the public on criminal charges relating to gathering in public or not wearing a mask.
- Apathy regarding investigating the increase in excess all-cause mortality since the roll-out of the modified RNA injectable product.
- Refusal to release anonymised record-level data for analysis of relationship between deaths, injuries, and COVID-19 injections.

It is imperative and ethically owing to the Australian public to have an independent investigation conducted concerning the damage and injustice inflicted on millions of people in this country.

I have no hesitation in joining my voice to those of thousands of others demanding justice and restitution to those who have suffered because of government ineptitude, indifference, or possibly malfeasance.

Keith Smith, PhD
