

## Submission to the COVID-19 Response Inquiry

Vaccine procurement and secret vaccine contracts – why were these contracts secret? They were not in the interest of the Australian people and indemnity was given for an experimental product that many of us felt was not right for them.

Vaccine mandates were forced on the Australian people and were blindly followed done in lockstep all over the world. The countries that did not do this to their people fared the best in this overcontrol situation.

There was no evidence mandates would help in anyway and made the situation worse. There were only a very few politicians and senators who spoke up for the people and they are now heroes. The others followed the ridiculous decisions to lock people up and it became clear they had not used their critical thinking or common sense, and now their place in parliament is questioned by many – to the extent of a no confidence in any of the political parties. They showed what kind of people they were, which was not for the people but rather to keep their jobs instead. They will never be forgiven and should all be expelled from parliament.

The mandates saw a different type of police dressed in black who were very aggressive. People were arrested, beaten up and fined for not wearing a mask or being outside in the fresh air and sitting down. Anyone would have a mind would recognise fresh air and sunshine is what a plant needs and so does a human. Limiting people to enjoying their basic human rights was a crime against humanity.

I was living at [REDACTED] at the time and there were police patrolling the streets to keep people in fear and controlled. After some time the pressure was transferred from eastern suburbs to the Western suburbs in Sydney. I had friends in Western suburbs who have lived through communism and they were very scared. Meanwhile in [REDACTED] there were thousands of people partying at the beach.

No one has the right to coerce others to take part in an experiment, with an unknown substance that had no long or short-term studies. Many people had this substance injected into them against their wishes and without informed consent. The packaging was blank, and doctors were coerced to not give the correct information. People have lost their respect of Doctors for putting money before their clients well-being as they were scared of losing their job. I know a cardiovascular surgeon, midwife and ambulance driver who all lost their jobs, plus many more. SES workers were not able to volunteer during the floods, teachers were either coerced or left their careers. Many people were coerced to leave their job and relocate and have still not recovered from this government over reach. And now a massive surge of immigration when thousands of Australians are left homeless and unemployed. What are you doing about this?

The people were lied to that the injections were safe and effective and they were not, there was no evidence to say this only a marketing campaign. Any politician that blindly followed this campaign, should be held responsible for the personal injuries and damage to the Australian people and economy. The Government misinformation

in the media regarding the ability of vaccines to block infection and transmission along with denial of vaccine injuries and gaslighting of the injured is unforgivable. I know several young women have taken part in these experimental injections have experienced miscarriages and still births at an alarming number. Where is the research into this?

Vaccine injuries – personally I know many people whose health has deteriorated after these experimental injections and others who have died soon after. The government is ignoring the excess deaths data and are not looking into it, yet they shut down the whole country. There was no open debate on the Government run ABC – this was all controlled by the government. I have 3 friends who died soon after the injections and I was not able to submit this information to the TGA as I did not have their power of attorney. It is a well known fact less than 10% of injuries are even reported. The injections should be stopped immediately. Never given to pregnant women as they were not tested on them, or small children who didn't need them as they have a robust immune system. There is no follow up research to understand who those who have had these injections are constantly catching colds and flues. Shame on you. Why is this data not being reviewed. New Zealand has released some damning data that is being censored and as the government who is speaking for the people if not you?

The AHPRA lack of due diligence on safety, their silence on undeniable harm of the vaccine and their action along with ATAGI to silence the Medical Profession is wrong. An organisation who is funded by private interests should not have the say of what goes on in a country. Where is your discernment to see that this is unacceptable.

Who decided to do the opposite of the 2019 Australian Health Management Plan for Pandemic Influenza, which prophetically described why all of the actions the Government did take would not work and would cause hardship?

We need answers, not a whitewash. You need to speak up for the country and use your common sense to see what has happened and have the courage to support the people rather than your pay packet.

Speak up and don't just follow the party guidelines to keep your jobs at the peril of Australian people who you are to serve. I would like you to reflect on what support you gave your constituents at this time. I left the city and relocated to a country town. The local government reps were nowhere to be seen at a time of need, when people were being bullied by their own government. The older people in the town were very frightened and we needed to have secret meetings to support them. Why did the churches close down as well, because they were afraid to lose their funding?

The Australian people have not recovered and the media funded by the government and other private interests are leading people from one fear to the next. Instead of bringing back unity into the community, we were further divided with this YES campaign.

Shame on anyone who did not speak up for the people of this once great country you are responsible for destroying it and should do many hours of community service as well as leave parliament for being traitors to the people.

Even supporting this rushed enquiry is not supporting the people and any cover ups will further destroy the cohesion of this land. Stand up and speak up and dare to be different to the sponsored government rhetoric.
