

There is an immediate issue with this Covid Inquiry in that it excludes all state actions. The actions of the States were supported **and paid for** by the Federal Government and the States and Federal Government together are the Commonwealth of Australia. These were all responsible for ensuring vaccine mandates, state border closures, lockdowns, quarantine rules and check-in requirements were put in place.

A submission window of one week in a period before Christmas is a signal that submissions are not really wanted or will be respected. The Inquiry is an appeasement to the Australian population to show something is being done. This is worse than the usual empty virtue signalling which we are exposed to relentlessly. It is even more cynical here as we are dealing with the life, death and continued suffering of human beings.

Governments exercised power that was not given to them by their people. They used this power to violate and coerce the population into accepting unsafe and ineffective vaccinations and to implement practices which destroyed local economies.

Clearly the Government knew the vaccines did not work as advised. When one shot was all that was required, they bought 8 doses for every person in Australia. Why would you need these unless they were going to be ineffective? Who made a decision to buy all these when viruses are known to adapt and change, making these useless and a total waste of money?

The National Cabinet met in secrecy, had only a few members and used their power to avoid any challenge or scrutiny. The public and respected others had no input into decisions which were fed through the State Health Ministers and CHOs to sing from the same hymnbook with no opportunity to challenge their actions.

Scott Morrison initially said on TV that everyone would be vaccinated, then stepped away from this when advised that this was unpopular. He then manipulated this to happen via funding to the States. He and the Federal Government were totally complicit in the injury and death of people who took the vaccination.

Even when the Pfizer trial data was released each month as a result of a US judge's order to release their trial data (which they had wanted hidden for 75 years), the Government did not update its advice to ensure safety and informed consent. No pregnant women were in that trial, yet pregnant women were encouraged to take the vaccines. These had never been tested on them. When vaccines were mandated, no exemptions were given to pregnant or lactating women even when miscarriage rates rose and babies died from the milk of lactating mothers.

The TGA which the Government relied on is 95% financed by big pharma and when Pfizer admitted in the Netherlands Government that they had never tested their vaccines for transmission, the Government did not advise the public or change its advice. It did not stop demonising the unvaccinated and continued to fund the ABC and other media to do so.

The Government removed products such as Ivermectin and Hydroxychlorine from use to enable the vaccines to be given emergency use authorisation. Even when other countries showed these treatments were effective, the Government ignored the information and did not consider re-evaluating their use.

The National Cabinet was set up to bypass the usual checks and balances of our system. It met in secrecy and allowed the group of people who sat on it, total power which was both

unprecedented and undemocratic. The information went from the Cabinet to the Health Ministers and CHOs without input from experts, the public, even other Government ministers and appointed members of parliament. The minutes of this Cabinet have not yet been released. Everyone except these few people were excluded from discussions and decisions that would affect their lives, including the lives of future generations.

The PM gave himself a number of ministerial positions, which was unprecedented and was not even made public or advised to his own party. This was illegal, unconstitutional and should never have happened in a functioning democracy.

Border closures split families, impacted people's ability to work, access medical help and cost a fortune to implement. There was no benefit. The actions were sanctioned by the Federal Government and activated by the States who were rewarded in grants and handouts to apply testing, mandates, lockdowns and other forms of coercion against their people.

The treatment of people in aged care homes was truly appalling. Residents were left without qualified staff to look after them, deprived of seeing their loved ones and exposed to vaccines that were never tested for their age groups. They were not exempted if they had Covid, but provided more vaccinations even though natural immunity was shown to last and be more effective. Again the Government did not take account of studies that showed natural immunity data that they did not want the public to know.

There was NO informed consent to take experimental gene therapy drugs. People were advised they were getting vaccines whilst the classification being used was gene therapy. This was a crime by Government with the assistance of the TGA.

Children should never have been given these vaccines and the trial data released by Pfizer highlighted this. Why was the data ignored and the access extended to even younger ages without any evidence that children were endangered by this infection?

No advice was provided on the importance of Vit D and other vitamins and minerals even when data showed that these were missing in those who caught infections. Nothing was offered to assist people to boost their immune systems naturally – everything was put into the vaccination propaganda by harnessing mainstream media to be the arm of the Government.

No review was taken of other countries' approaches to identify if there were other ways of handling this pandemic. Sweden, for example, took a different perspective and had a much better outcome.

No assistance was given to people in how to handle Covid if they contracted it. This meant people were left to find their own way through this – no efforts by Government to ensure home support remedies. El Salvador gave their people support packs in advance.

There was no risk differentiation or personalised health care or post vaccination monitoring as should have been the case in using an experimental drug. Giving gene therapy jabs by incentivising people with a free sausage in Bunnings car parks demonstrated the completely ridiculous nature of the Government's response (sanctioned by the Government and implemented by the States using Federal money and paid to large corporations who benefited from that money). Where was the adherence to medical rigour? Where was the adherence to the protection of the Hippocratic oath by nurses and doctors who participated in this farce?

There is no investigation into excess deaths. Why not? Why would something so tangible not be worthy of its own review? It is unprecedented. We had a Commission into deaths caused by putting in dangerous roof insulation when only a few people were affected. Here we are talking about numbers that are equivalent to a jumbo jet full of passengers being killed each week and the Government says nothing at all.

Everything the Government has done, in collusion with the States, to coerce people into taking an experimental drug has contributed to these excess deaths. Their actions are in breach of the Nuremberg Code, which was designed to stop such totalitarianism ever occurring again. The Code was put in place to ensure that no-one was ever to be allowed to be experimented upon again and yet, this is exactly what happened.

Masks were required using what supporting scientific data? Credible peer-reviewed reports have all shown the ineffectiveness of masks. Worse still, these reports have also highlighted the health danger of long-term use (over 2 hours at a time).

There were no effective steps in place to deal with the discarded masks and other products required to be used, yet the Government says it is concerned with the environment and sustainability.

Much of the data relating to decisions and information relating to TGA actions, vaccine harms, contracts with vaccine providers etc all have to be sought through the use of Freedom of Information requests. Why is this the case when the public have the right to know how their taxpayer money is being spent and who is benefitting?

The Government database to collect injury information was not working effectively. When information was input by injured people, the submit button did not work, so the data collected does not represent the true picture.

People were not advised that a Death and Disability scheme had been developed and provided by the Government. This scheme was released at the same time as people were being advised that the vaccines were both safe and effective. How many people would have taken the vaccine if they knew the Government was expecting harm to occur?

As the jab effectiveness ratios have moved down almost monthly from the first quoted 95% effectiveness, the Government has not made this public or updated its advice. Why not? How can people give informed consent when the information they should be provided with is not there?

Vaccine exemptions were not allowed to be given by doctors. They were threatened by the organisation that was run by Scott Morrison's brother. Why were doctors not allowed to exercise their judgement as medical practitioners? Why are they not allowed to speak now?

When Florida in the US, and other countries such as Thailand, identified the adverse impact of the vaccines on young males, why did the Government not investigate this and inform the public? Universities were still mandating vaccines and the Government did not change its advice to them through the CHOs and Health Ministers. These vaccines have killed and injured so many young people who were never at risk of any harm from the infection. Government grants to complying universities need to be reviewed to see if these institutions were rewarded for their efforts.

What research had the Government at all levels done to prepare in advance for a pandemic? The public should know this along with the facts about what preparations for handling a pandemic were overridden on this occasion.

People need to be held accountable for their actions in breaching the Nuremberg Code and their role in injuring and killing both our people and our economy.
