

Covid Response

Covid measures went too far and were harmful for individuals and the Australian population as a whole. This is clear from many in my community whose sentiment is that mandates, 'lock downs', 'school from home' and the idea of 'non-essential workers' and 'universal masking' were unprecedented, over-reaching and Government failings. Many prefer to agree quietly, speak socially instead of professionally or are aware but stay silent; people are becoming increasingly educated about what has happened and what is continuing to happen. Experts and professionals are becoming whistle blowers eg [REDACTED] and Dr [REDACTED] and the public is seeing the rise of government backed surveillance, **censorship and propaganda**³, this really became evident during the pandemic response. There is growing awareness that if we don't address Australia's failings and worse, accept to follow the World Health Organization's new Pandemic proposals that Australia's future pandemic situation will worsen and result in even more damage in the future. Trust in media and government is eroded, as witnessed in the recent 2023 referendum, where a majority of the public went against government, media and corporate advice. Harm and fallout has been evidenced through physical, mental, educational, social and economic health downturns in almost any population based metric. One example being the increase in All Cause Mortality, as documented by the **Australian Bureau of Statistics reports** since 2021⁴, which can not be explained away after accounting for Covid deaths and even people with covid as a co-morbidity at the time of death. Youth suicide, drug and alcohol use as well as increases in people falling into poverty and un-managable economic debt were all foreseeable under the phenomenon of **Deaths of Despair**⁵. A growing percentage of Australians are aware of how government measures failed to meet government responsibilities while exceeding their role in redirecting decisions and power to themselves in a monumental and unprecedented way. This was to the detriment of Australia's population in favor of pharmaceutical and corporate interests.

The Federal Government failed to pass proposed Anti-discrimination Bills

² [REDACTED] **FACNEM**. 12/07/2022 with journalsit [REDACTED] in Adelaide said it was "almost as if the measures were deliberately instigated to diminish the health of the background population" - due to lockdowns there was a lack of exercise and sunlight, social contact and connection diminished which resulted in changing bio and neuro chemistry increasing mental health disease, speech delays and neurodevelopmental conditions.

ARPHRA and censorship meant vaccine injuries ignored etc. "a significant group of doctors has either shut down or have gone quiet. Many doctors are playing along as they are too afraid and others are so indoctrinated by the system that they believe it, the cognitive dissonance is too great for them to face. Most Doctors are told not to report adverse events to the DAEN reporting system of the TGA.

³ For a great overview of this using the Canadian broadcaster as an example of media connected with the Trusted News Initiative see

⁴ ABS abs.gov.au/statistics/health/causes-death/provisional-mortality-statistics/latest-release Reports a current 2023 10.9% excess mortality compared to baseline average, 5.7% less than 2022. 2022 existed for the majority not only above the baseline rate but outside the baseline range. If the pandemic originally killed the sick, elderly and weak the years 2022 and 2023 should be lower than average or around baseline. The excess therefore points to harms from government measures such as lockdowns, mandates, masks, economic and mental health stressors, vaccinations and deaths of despair.

⁵ Deaths of Despair. First suggested in 1897 by French Sociologist [REDACTED] as 'anomic suicides', alienated death/ suicide due to breakdown in social equilibrium or social norms, lack of communal spirit or perceived government indifference to their needs. It was again brought forth in the late 1990's by [REDACTED] and [REDACTED] from Princeton, finding alcohol and drugs, alcohol liver disease and increases in suicide are largely driven by economic misery.

- **COVID-19 Vaccination Status (Prevention of Discrimination) Bill 2022**
- **Fair Work Amendment (Prohibiting Covid-19 Vaccine Discrimination) Bill 2023**

Because of this many citizens including front line workers who chose to not participate in the 'mRNA vaccine' partially approved use roll out suffered mentally, financially and socially. This included suspensions, employees fired and ensuing consequences such as lost homes and homelessness, relationship and family breakdowns, suicide and domestic abuse increasing due to social and economic consequences.

More to the point society as a whole lost the use of paramedics, police, doctors, nurses, firefighters, teachers and child care employees and psychologists etc. Some of whom spoke out about the harms and dangers to society but were attacked and defamed or censored.

It is clear that Vaccines can and do cause harm as evidenced by the number of **reports accepted by the TGA**⁶. Provisionally registered medical products rely on adverse event reporting to build a safety profile, the majority of reports received by the TGA have historically been submitted by doctors and medical professionals or pharmaceutical companies. **The Forrest of The Fallen**⁷ is a phenomenon throughout Australia that displays memorials to some of the dead and permanently injured. There are over 2,500 papers published on the side affects and harms, including death, that can arise from the covid-19 vaccines that were coerced into many people. There are plenty of medical professionals qualified to summarise and point to key findings. The evidence is growing weekly about the harms of masks, vaccine, medical and social measures. Any government department or policy using bribes or coercion to increase uptake or minimize actual harms of the measures implemented were and are a huge problem.

Other evidence supporting the impact of the failure to pass these bills above is a recent paper concluding that the **un-vaccinated were unfairly scapegoated and suffered discrimination**⁸.

The Australian Government failed to follow protocols from past pandemic plans even those developed through Australian funds in favor of a novel approach that was experimental and harmful. Dr [REDACTED] **former WHO advisor**⁹, professor and expert in Pandemic preparedness in Switzerland attests the lockstep approach of the Western world went against all former past pandemic approaches and plans.

Failure to address discrimination of the un-vaccinated also resulted in many experts and leaders in their field being ridiculed, fired and silenced, even early on when little was known and all information should have been considered¹⁰. There are still professionals who went along to keep jobs that are well aware of how grievous the vaccine coercion and social

⁶ TGA [tga.gov.au/news/covid-19-vaccine-safety-reports/covid-19-vaccine-safety-report-02-11-23](https://www.tga.gov.au/news/covid-19-vaccine-safety-reports/covid-19-vaccine-safety-report-02-11-23)

Reports a reporting rate of 2 per 1000, or 139,654 reported adverse events. This is far in excess of one in a million and there are 1004 reports of death. Noting the majority of DEAN reports are from doctors or medical personnel. Many are likely serious in nature including the acknowledged peri and myocarditis. TTP, clots etc.

⁸ A Useful summary/interpretation can be found at vigilantnews.com/post/unvaccinated-scapegoated/

⁹ [REDACTED] PhD PhD MSc a professor and researcher. Eg worldcouncilforhealth.org/multimedia/dr-astrid-stuckelberger-who-pandemic-treaty/ she has been voicing concerns about the globs covid responses and measure since 2020.

¹⁰ Eg amps.redunion.com.au Australian Medical Professionals Society who aim to provide an alternate voice to the AMA.

measures pushed in Australia were. If the inquiry doesn't give a voice to many of these people the public will suspect large bias.

Of great concern to many was the overreach of extending the state of emergency past what was understood to be legally allowable, withholding constitutional rights to its citizens such as the right to work and travel within Australia and ignoring medical rights to refuse treatments and visitation to dying loved ones, postponing weddings, making funerals remote view only and pushing interventions that constituted huge conflict with the agreements made under the Helsinki Accord and the Nuremberg Code¹¹.

In terms of securing medicine and vaccines it appears that in Australia, as well as internationally, supplies were required to be bought based off international agreements with pharmaceutical companies and NGO's?

Imagine a future where purchase wasn't of poorly tested novel technologies and purchase of amounts was based on demand and not excessive, such as five times the requirements per person, ordered in advance for every citizen - at a time when they were only partially approved for the elderly. It looks to some like pre-meditation or money-laundering.

Imagine a future where measures were advice only and experts on all sides were allowed debate and public forums, good ideas and truth tend to win the public over. Wasn't that what Sweden did? And as a result has had lower all cause mortality in the last 4 years combined, less economic disruption and less mental health and educational fall out. If politicians and media backed off from doctor patient choices and allowed practitioners to prescribe and advise on a case by case basis trust for future government advice may improve. Why did Australian governments make access to approved drugs difficult when evidence of their benefit was growing and their risks known? Who made these decisions and what they were based on? Conflicts of interest should be investigated.

Quarantine facilities, vaccine coercion/ mandates, lock downs and universal masking amongst other measures were understood by many to constitute human rights violations as early as 2020 and were protested frequently during the past 4 years in capital cities and regional centers. [REDACTED] a human rights activist a holocaust survivor likened the treatment of the un-vaccinated to that of the Jews in the German pre World War Two lead up¹². The Australian Government effectively allowed and encouraged this treatment.

Lastly if one wants to make sense of the evolution of the pathogen covid-19 and the 'countermeasures'/ mRNA platform vaccines look to Dr [REDACTED]¹³ patent analysis of how we got both the covid-19 pandemic and the 'vaccines'.

And for harms of the vaccines listen to recent NZ whistleblower¹⁴ speaking to the batch and site mortality rates with temporal association.

¹¹ The Nuremberg code is for permissible Medical experiments. As the vaccine platform was a novel technology, not properly tested and not approved except provisionally they remain experimental. No experiment according to this code may be given without free consent. Holding social inclusion, access to employment or education etc is coercion, overreach and duress. Also 5. states that when there is fore knowledge that disability or death may result the experiment may not be conducted. That is why adverse events were minimised, victims gaslit because it was clear before the middle of 2022 that people were becoming injured and some were dying. This was long before it was expanded to children.
