

Submission for Covid 19 Enquiry

In this submission I would briefly like to address the following terms of reference for this enquiry - Governance, key health response measures, broader health supports, financial supports, and mechanisms to better target future responses

The entire "Covid 19 Pandemic Response " was handled very poorly by the Australian Government. The coercion and fear tactics of the Government are inexcusable.

The most poorly handled aspect of the response from my point of view was the mandating of Covid 19 vaccinations by NSW Health for Health care workers and the way in which non vaccinated staff were treated by NSW Health.

The Prime Minister at the time, Scott Morrison, stated publicly, that Covid 19 vaccinations were NOT mandatory, (1) In Nationally administered organisations such as Australia Post, this was the case. It is my understanding that federal law over rules state law.

[REDACTED] for over 40 years. I was a dedicated [REDACTED] and worked hard. I missed many important family and social functions because I was working. At one point for 18 months I worked every Saturday and Sunday. In 2020 [REDACTED] and [REDACTED] I worked hard while most of my friends and acquaintances were being paid to stay at home and redecorate or watch net flix.

In 2021 NSW Health mandated two Covid 19 vaccinations for all NSW Health Staff. This was ILLEGAL. The Nuremberg Code states that it is illegal to force any person to receive an experimental injection. Clearly the Covid 19 vaccinations were experimental and using new technology. There had been no long term trials.

The Australian Immunisation handbook states that vaccinations can only be given with informed consent. (2) How can informed consent be given when there is no trial data?

The US Texan Attorney General is, as you would be aware, now suing Pfizer for false and misleading information.

Because I was unable to give informed consent I chose not to have have the Covid 19 vaccinations. I was forbidden to come to work as of the 29th September 2021 and then fired on 20th December 2021, even though I had many accrued weeks of long service leave. I believe the actions of [REDACTED] were inhumane, and against human rights. I was fired by a manager I had had no contact with at all, and 5 days before Christmas was cruel timing. Can you explain to me how a year before this I was apparently a "valuable" employee, on the front line of this apparently "deadly pandemic", and a year later I was treated as a third rate citizen.

I was given a number to phone for "support" that went to a recorded message. There was no personalised support from an actual person, and I was forbidden in writing to set foot on my previous work site. For an organisation whose entire focus should be on health that is not acceptable.

I of course, [REDACTED] I am now 66 years old and [REDACTED] where I do not earn enough to pay my bills. I am being forced to sell my house. My mental health. Is extremely poor and I feel I have been tossed away in the trash. The way the Federal Government and NSW Health marginalised, blamed and scape coated those of us who wanted some information about the covid 19 vaccination was, once again, inhumane, and constitute crimes against humanity as per the Nuremberg Code.

There are many questions that need to be asked by this enquiry, such as

Why was the definition of a pandemic altered not long before the emergence of Covid 19?

Why was the definition of a vaccine altered not long before the emergence of Covid19?

Why were decisions that were made by “Health Officials” and the Government not evidence based and why did they not follow best practice models?

Why was the use of Ivermectin, which is a Nobel Prize winning drug with the administration of over 4.6 billion doses, and Hydroxychloroquine initially suppressed, despite the fact that at the time, Ivermectin was being issued to the Indian public by the Indian Government? Maybe because it is cheap and effective? No gain for pharmaceutical companies there.

Why did the Australian Government suddenly change track and then issue Ivermectin to ED patients? Why was Remdesivir used in Australia Hospitals? Because it is an expensive drug and earns drug companies a lot of money?

Why were we promised that if we had one vaccine it would “Flatten the Curve”? Instead we were told by “health Authorities” to have more and more vaccinations, and were forced into lock downs, scanning, tracking and quarantine. That is an infringement of civil liberties, and of course has undermined most Australian’s trust in the government. It has made us very suspicious and distrustful. Not to mention that it ruined businesses, and has made people homeless and caused many suicides and long term mental health issues.

Why if vaccines are safe, are vaccine manufacturers indemnified against harming or killing people? Why are they not held accountable like anyone else in society - for example a car manufacturer or even a person driving a car?

Why, if the Covid 19 vaccination was “Safe and effective” has a compensation scheme been launched?

Why were Australians not permitted to cross state borders, in one instance resulting in the death of an unborn baby when the mother was denied entry to Queensland. (6)

Why was PCR testing used when the inventor of the test stated that it should not be used to diagnose Covid 19?

Why were competent doctors such as [REDACTED] suspended for voicing a rational opinion with supporting evidence? That does not sound scientific and unbiased to me. That sounds as though someone in authority has an agenda. Why? I believe there is a covert agenda, and I believe the Government must be stopped from reacting in the same manner in the future.

Why was Parliamentary process by passed? National cabinet cannot make laws.

There are a lot of questions that require credible answers.

I hope that the panel the you have chosen to review the evidence is truly independent and that the people on the panel have the appropriate knowledge to investigate without bias and pay offs.

For my health, I believe that I made the correct decision when I chose not to be vaccinated. There is evidence everywhere that the Covid 19 “vaccinations” have caused a lot of deaths and disability and put a huge burden on the health care systems of the world. (3) (5)

[REDACTED], cardiologist, for example, cites a study done in the USA by Nakahara and colleagues with 700 vaccinated and 300 unvaccinated participants who had P.E.T scans. This study concluded that almost every vaccinated person had changes in their heart that were a disease pattern, and that these disease patterns were caused by the spike protein that remained in the heart. (And was not quickly cleared from the body as the vaccine makers would have us believe.) [REDACTED] also stated that people are now having cardiac arrests without having myocarditis. He also composed a world wide study of all the peer reviewed published autopsies performed on people who died after having the Covid 19 vaccination. This team concluded that 73.9 % of these people WORLD WIDE died as a result of having the Covid 19 vaccination (4).

There are thousands more articles by renowned medical doctors from varied fields of medicine who have found many adverse reactions to the Covid Vaccine, the most severe, of course being death.

I sincerely hope that the governments response to the Covid "Pandemic" is investigated without bias and those responsible for horrendous crimes against humanity and violation of human rights are held accountable.
