

As a community worker, I lost my job due to the push in this field to have workers 'vaccinated'. I declined to have an experimental vaccine.

With a plan already in place in 2019, the Australian Health Management Plan for Pandemic Influenza, I would like an enquiry as to why this wasn't implemented. Who decided to do opposite to this and therefore cause the government to take drastic measures which caused hardship everywhere from mental health, to job losses. All these actions were far too draconian.

I would therefore request a full Royal Commission with proper investigations into the following areas:

Vaccine procurement and secret vaccine contracts

Vaccine mandates

Vaccine injuries as many of my friends and some family have had reactions, some of whom have passed away through turbo charged cancers, and thus the government misinformation in the media regarding the ability of vaccines to block infection and transmission along with the denial of these vaccine related injuries and gaslighting of the injured.

Mask mandates and lockdowns

The silencing of the medical profession due to AHPRA and ATAGI and these organisations lack of due diligence on safety, and their silence on the harm caused by the vaccine.

We need answers so this doesn't happen again especially given the WHO wants to change their constitution so they have complete control when 'they' call the next pandemic.
