

Submission to the Covid Inquiry

The taxpayers of Australia deserve a Royal Commission into the handling of the covid 19 pandemic. The terms of reference of this inquiry are too limited as they do not include the independent activities of States and Territory Governments which imposed draconian requirements upon the public including mandating experimental vaccines in order for people to be able to keep their jobs. The collusion between the Federal Government, State and Territory Governments and large corporations also needs to be reviewed. Large corporations took it upon themselves to implement the draconian Government measures without reference to fairness, reasonableness or even legislative requirements. The stress and anxiety caused to people who knew these shots were deadly but were forced to choose between their own health and well-being and the health and well-being of their families is scandalous and deserves a full unbiased and transparent Royal Commission.

Waste of Taxpayer Money pursuant to secret vaccine contracts

Why were 255 million vaccine doses purchased by the Federal Government when only a quarter of this number roughly 60 million were used?

Why were the terms of purchase of the vaccines not made public? There seems to be prima facie evidence of wrongdoing due to the scandalous over purchasing of vaccines thereby wasting taxpayer money and lining the pockets of big pharmaceutical companies. Millions of vaccine doses have been thrown away which means millions of dollars of tax-payer money has been literally poured down the drain.

Government misinformation

During covid, the Australian Governments put out continual misinformation about:

- The efficacy of the PCR Tests for detecting infection- the PCR tests were not fit for purpose and this fact was known by the Government health bureaucrats and was well documented amongst experts in the alternative media at the relevant time. The now deceased inventor of the PCR Test was seen on video confirming that if the PCR test was done with enough cycles, anything could be found and this did not prove infection.
- That asymptomatic people were infectious – this was a complete fabrication and contrary to the science.
- That the vaccines prevented transmission – this again was a complete lie that was exposed as soon as the vaccinated continued to catch covid.
- That the wearing of masks reduced the risks of transmission – it was known prior to the pandemic, and it has been proved since the pandemic, that masks do nothing to prevent the transmission of a virus. In fact, masks are harmful to the wearer and can lead to a number of other serious health complaints. Despite the medical evidence why were mask mandates introduced? Why were children in schools forced to wear masks when they were in no real danger from the virus? Were these mandates about health or were they about Government control, power and overreach? The public deserve truthful answers.
- Lockdowns – the devastating effects of lockdowns on the health and well-being of Australians was obvious. The scientific evidence for their utility was clear, they did nothing to prevent the spread of covid rather they destroyed the mental and economic health of the nation. A recent University of Wollongong study found that at least 1 in 4 parents reported feeling stressed and overwhelmed and up to 12% of children experienced “very high levels of mental health difficulties”. There was a marked increase in depression and suicide as a result of lockdowns. There was increased substance abuse and domestic violence. The

Australian Government along with most other western nations happily signed up its population to the largest ever psychological experiment with ripple effects on every aspect of human life.

- Public health officials unashamedly pushed continual fear mongering messages to the public for the purpose of encouraging compliance with unreasonable and draconian Government edicts that were contrary to the science, contrary to natural justice and common sense. The relevant public health officials need to be held accountable for these actions.

The Australian public deserves a full investigation into the above, not a whitewash inquiry by the some of the same people who pushed these false narratives during covid.

The Government is still pushing the misinformation bill and has exempted itself from this legislation. The reality is that the Government pushes more misinformation into society than any other body and yet has the audacity to suggest such legislation. This is also scandalous and should be investigated by a Royal Commission.

Worldwide misinformation pushed by the mainstream media with the same headlines, tag lines and content shared around the globe in real time.

The Australian Government needs to come clean to the Australian people about the influence of the World Economic Forum, the World Health Organisation and the United Nations on the Governments response to the covid 19 pandemic. The Australian public deserve answers from their leaders as to why there was 'one narrative' that was the same worldwide and there was no real debate or questioning of the 'science' allowed. Any expert that held a different view to the Government was censored and ridiculed by the mainstream media and the regulators. This censorship is anti the very nature of science which involves debate, research, further learning and the ability to adapt the response to the development of the science. 'Science' was determined by a few approved voices and was not open to debate. This is not science it is propaganda disguised as science.

Were the vaccines safe and effective or at least fit for purpose?

Why did the Government give \$8 billion to big pharma for poorly tested gene-therapies? Clearly part of the assessment of whether the vaccines are safe and effective and fit for purpose relies upon the reporting of adverse events. Why did the Government censor and bully everyone and anyone from criticising the vaccines, thereby aiding and abetting the massive harm done to the population of Australia through the lack of adverse event reporting? So many doctors and health professionals were censored and bullied into recommending the vaccine and not providing exemptions. Health professionals who questioned the efficacy or safety of the vaccines or the actions of the Government were threatened with the loss of their licence to practice medicine by AHPRA and ATAGI.

The pharmaceutical industry seems to have control of Governments and is unaccountable to any regulator for the safety or otherwise of its products. This fact needs to be investigated and fully understood.

Why did the Government mandate vaccines which were not safe and effective and were not fit for purpose?

Despite the untested nature of the vaccines, Governments took it upon themselves to mandate the vaccine. This is scandalous and the politicians responsible for these mandates should be held accountable.

The evidence of vaccine harm is becoming mainstream through the actions of whistleblowers despite the attempts by Governments around the world to hide the harm done. The forest of the fallen around the nation provides a visual representation of the harm done to the people by the Government. People are waking up and are looking to the Government for answers. A whitewash covid inquiry is not going to satisfy the public, not now, not ever.

[REDACTED] There are health bureaucrats around the world who may be investigated in the future as the public continue to demand answers. This inquiry has the opportunity to conduct a full review of the pandemic [REDACTED]

Conflicts of interest

The Government appointed the chair of CEPI (which pushes mRNA and 100 day vaccines for the Gates Foundation), Jane Halton to review the procurement deal between the Government and the pharmaceutical companies. This is a flagrant conflict of interest and is a clear demonstration that such a review was an attempt to hide the truth not reveal it.

Please treat the Australian public with respect by setting up a Royal Commission with broad terms of reference to include the above matters, staffed by people who have no political or pharmaceutical conflicts of interest.

Yours sincerely,

Peter Jackel
