

2021 was the year that my life turned upsidedown. First Somo stood up and said that the covid vaccine would not be mandated.

In fact it never was for politicians and hundreds of workers who were federal were also never mandated or given options to have an exemption.

Then at a federal level the constitution was ignored and the states were told that they could mandate. After nursing for ■ years and loving my job,

I found myself having to make a decision between taking the experimental injection with no long term studies and keeping my job.

As sole carer and

financial provider for ■ this was heartbreaking. ■ watched 10 ■ out of 100 in my ■ killed by the covid shorts and then

I was expected to take it and risk this happening to me. I voiced the reason for deaths to Drs but they had been silenced as had I by AHPRA with warnings

that "It was safe and effective" If we wanted to remain registered.

I was stood down on no pay for 5 months and then terminated from the job I loved leaving

■ severely short staffed. We were so short staffed that in the last fortnight that I was allowed to work ■ I

actually worked 12 nights instead

or 9 nights as they were short staffed. When I was stood down, I had already obtained and read the 68 page document from the TGA with reported adverse reactions.

Given the threats that Dr's and nurses were given it was amazing to find that this many reports had been made. Meanwhile the deaths were all old people and it is common for old

people to die from the flu. Nurses ■ did what they were told to do by the ANMF, by AHPRA and by the Nurses Board of Australia (who work in AHPRA offices,

are paid by AHPRA and take their directions from AHPRA within the guidelines of the legislation!) had told them to do. They convinced around 100 ■ that this was safe

and effective and "you don't want to get COVID!" Coercion was EVERYWHERE and lies as well.

I joined telegram groups and connected with other nurses in Australia only to find that they were seeing the same things. It became clear to me that if I took this that I was risking blood clots,

stroke, bleeding, neurological issues and could even be injured to the point where I could no longer work. I have been the sole carer for my

■ who has been sick ■

with no services from the government and even though not taking this injection would result in me losing my job I could not risk being injured or killed by it. There would be no one to

look after ■ then . The TV constantly told me it was safe

and effective and that clots etc were rare. After finding another job in member support and talking to nurses and teachers all day every day in my job, every person that I spoke to knew someone who died or was permanently injured from these jabs and sometimes after only just one.

We constantly got emails from work reassuring us that this was safe and effective. The TV also told me that it was safe and effective constantly, "trust the science!" I was no longer allowed to test the science. I took the sick leave calls in the mornings at work and heard nurses calling in with adverse reactions after they took their injections. One nurse told me that the room spun for 3 days and she was bedridden with nausea and vomiting. A cleaner had so much pain in her arm that she could not move it, many nurses started calling in sick with migraines that they had never had before. One nurse got a clot from her knee to her groin and took a month off sick. 3 Different nurses who were young rang in sick after having a fall in the shower while getting ready for work. This NEVER happened before. [REDACTED] a lady in her 90's vomit big blood clots the size of your hand for 5 hours 3 weeks after the second pfizer. She was palliated and died.

At the same time the TV and [REDACTED] facility management care kept telling me that it was safe and effective even for pregnant staff and as a nurse I had to take 2 (now 3 and the flu shot) if I wanted to keep working. I was petrified.

Friends who got covid were getting such mild symptoms and recovering fast that it felt to me like the price I had to pay to keep working and take my money was to risk my current and future health and life itself!

I studied further and found that they had tested this on ferrets (they all died once in contact with the live virus).

I asked my work place for a risk assessment. Some evidence that this injection was not as risky as the virus but they said they did not have to provide this because of the mandates.

I carefully checked the consent form and found that if I signed it that I was agreeing that I could have unknown side effects as it was a trial.

Remember that the federal decision to allow the states to mandate caused this.

I could not do it . The risk was too great to my health compared to the perceived benefit. All my nursing career I took all my vaccines and also vaccinated [REDACTED] Vaccines were to prevent us from getting the illness. Suddenly this all changed and we were told that we could still get it and still pass it on and had to take to protect others. Trust the science . Then we were told you could spread if you had no symptoms. No symptoms means you are well, not sick! After a year of no vaccines when we had no cases [REDACTED]

██████████, suddenly after the vaccines

We started to have a lot of cases and even one death from covid. Brett Sutton then came out and said that 3 or 4 do not stop you catching it. We were allowed to choose in the past if we wanted to risk catching something like the flu but suddenly we were not allowed to make this choice any more if we wanted to work .

It was clear that even though I was well and rarely sick that I was not going to have an income while the mandates lasted. Now the policy remains in Victoria so I still cannot nurse in Victoria unvaccinated. After working constantly since ██████████ other than short breaks to have ██████████ I was suddenly told that I was no longer welcome at my workplace and that my income was zero.

I survived on savings as well as drawing down on my home loan with no income . I had a granny flat that ██████████ had been renting . I tried to raise her rent for the first time in 6 1/2 years to make ends meet and she stopped talking to me. Refused to pay any more rent even though we had been subsidising her rent for all this time while I had work and moved out leaving us with a disgusting dirty damaged unit and refused to pay money to fix it. She said that I should have just taken the injections and kept working. We are now estranged.

This was a very stressful time for us and particularly ██████████ as he was panicking in case we had to sell our house which was set up for his mobility ██████████ and health ██████████ as I no longer had income. I started to look for a job but most had vaccine mandates in place. I was fortunate to find a work from home job but it is not nursing. I may never be able to nurse again. I was a loyal nurse who always put the residents and patients first and going the extra mile and now that is all gone. My wage is a lot less than it was.

We have had to cut back on medical services that ██████████ has that help his very difficult life such as massages for pain. ██████████ helps out at the food bank and drops off some fruit and vegetables to us each week. He also lost his job ██████████ due to the mandates. Even though he had worked full time from home for the past 2 years and was a valued member of staff. He was terminated. From a federal level and above the right of the individual to think for them selves and to chose what risks that they wanted to take was stolen!

The Govt's made up rules that everyone was expected to follow due to risk of fines. Some people were deemed as essential like the supermarkets, other people were told that even though thier small business were essential in supporting their family and

employees, that they were not allowed to open. The statistics if you looked at it showed that those dying were old and even past the average age of death. There were no more deaths than usual although certainly all those put on ventilators and denied usual treatment for a chest infection died and died fast. Then remdesivir was suddenly the drug of choice and even though many people in the trial of this had their kidneys shut down and they drowned in liquid, this was the drug of choice in the killings of those put on ventilators. Nurses said nothing and followed orders even convincing them selves that they did all they could. Nurses who opened their eyes and saw the carnage spoke up and lost their jobs and their income.

Lies were told in the news papers, politicians lied, Everyone complied to keep their jobs. Even the first patients from Princess Ruby who went to Prince Charles hospital were not very sick except for one who had cardiac surgery prior to the cruise.

I connected with a large group of other people who did not comply with the mandates also and we supported each other swapping food from our gardens and sharing things we had if we had extra and another person had a need.

My relationship is quite broken with [REDACTED] due to the mandates. I still see them occasionally but I feel like I am the black sheep of the family now. [REDACTED] told me to be sensible and take the injections because the old people needed me. She blamed me for abandoning the [REDACTED]

I was traumatised by the deaths of the 10 (out of 100) [REDACTED] who died after taking the vaccine. I suffered guilt that I was not still working because I knew that the [REDACTED] really needed me and my skills. We had planned to save for retirement and now we cannot. I was discarded like a piece of rubbish! While Federal adds reminded us totally not to discriminate [REDACTED] These "vaccines " have [REDACTED] and I have strong religious belief that we should not kill for the greater good .

I talked to a journalist for the local paper who told me off the record that they all knew that long covid was a jab injury but they were not allowed to write it in the paper or the editor would pull it and they would lose their job. A registered nurse recently told me that the hospital is full of strokes and heart attacks and she is not going to take any more. The director of nursing had suddenly died and this nurse told me it was the jabs. I went to a funeral recently of a 56 year old fit nurse who was off land and loved her horses. She was in her uniform ready for work. Dead in a chair at home.

Another sudden death. She was all boosted up and would regularly remind people to get their boosters. It killed her. In 36 years of nursing I can remember only one young person who suddenly died. This is now COMMON.

It is the job at the FEDERAL level to keep us safe as Australian people. Not to allow states to go crazy forcing medical experimentation on its people by allowing mandates to occur at a state level .

Federal decisions resulted in massive increased suicides as well as deaths. I refer you to the AMPS book that has been recently released called TOO MANY DEAD

<https://amps.redunion.com.au/too-many-dead-event>

And also the data released from New Zealand where the whistle blower now faces up to 7 years in prison for DOING THE RIGHT THING!

This statistician, [REDACTED] has been arrested by New Zealand authorities for exposing this data:

[REDACTED] employee-turned-whistleblower, examined connections between specific COVID-19 vaccine batches and mortality rates. What he found was alarming:

Batch ID 1: Total Vaccinated 711, Death Count 152, 21.38% Dead

Batch ID 8: Total Vaccinated 221, Death Count 38, 17.19% Dead

Batch ID 3: Total Vaccinated 310, Death Count 48, 15.48% Dead

Batch ID 4: Total Vaccinated 364, Death Count 37, 10.16% Dead

Batch ID 6: Total Vaccinated 1006, Death Count 101, 10.04% Dead

Batch ID 2: Total Vaccinated 1018, Death Count 98, 9.63% Dead

Batch ID 7: Total Vaccinated 38, Death Count 3, 7.89% Dead

Batch ID 72: Total Vaccinated 5882, Death Count 278, 4.73% Dead

Batch ID 62: Total Vaccinated 18173, Death Count 831, 4.57% Dead

Batch ID 71: Total Vaccinated 11019, Death Count 498, 4.52% Dead

The underlying mortality rate in New Zealand should be only 0.75%, said [REDACTED] So the odds of all these deaths happening by chance is approximately 100 billion to 1.

"So statistically, what we're saying is that there is no chance that

this vaccine is not a killer," declared [REDACTED].

[REDACTED] responded to the case:

"The data is legit; that's why they are arresting [REDACTED]. He's a hero for exposing the truth."

Medicare death data proves the COVID vaccines are killing people. No more doubts. The debate is over.

<http://nswpr.com/?t=18222>

I request a proper Royal Commission for a proper investigation into:

- corrupt vaccine procurement and secret contracts
- mask mandates
- lock downs
- vaccine mandates
- official misinformation
- lies in the media regarding the ability of vaccines to block transmission
- media censorship
- vaccine injuries
- silencing of doctors
- the role of AHPRA and ATAGI in censorship and oppression of doctors
- the poor treatment of victims.

And restitution needs to be made to those who lost their jobs, were permanently injured or families of those who died after taking this NOT so safe and effective medical experimental injection.
