

I would like to address the COVID Enquiry as a normal and average Australian. Australia could have been an example for the world by embracing Ivermectin as the very low cost, broad spectrum treatment of this MINOR disease! 99.7% of people recuperate from COVID – it is NOT the super scary deadly pandemic disease as it was said to be in the media! Nor did we need to spend absolutely billions of taxpayer money on 5+ doses of the experimental MRNA vaccine for every Australian. Right now the vaccination of ALL Australians for COVID needs to be stopped! We are seriously maiming our kids and our population with ALL this vaccination – not just the COVID vaccine. The chart showing people who are vulnerable to COVID is those mainly over the age of 75 – who are also plagued with all sorts of other age related troubles not just COVID. The medical community seems to have forgotten that we have an immune system that is designed to grow stronger and better facing germs coming at us. We don't need vaccinations which tend to weaken the immune system and cause huge issues because of the ingredients it contains which affect the brain and our deteriorate our immune system. Currently 1 in 30 of our children have autism – up from 1 in thousands a couple of decades ago – with the only major difference being; massively vaccinating our kids at a very young age with over 23 different things before the age of 3! It's the time when their brains are growing the most in their lives. What is the matter with us Australia? We need common sense once again to govern us, not only with this COVID inquiry but we are listening to too many voices which defy wisdom.

Not only has the COVID vaccine shown to cause major heart issues in men younger than 35 years of age, but add to this, auto immune diseases, increased rates of cancer, long COVID, as well as a host of other awful diseases. We have an epidemic of young girls' worldwide getting Turrets syndrome which was spun off by the media as influenced TikTok. Again this was completely untrue because Turrets is neuro functioning which only occurs when the brain misfires and is brought on quickly by vaccination. The media has done great damage by spreading lies and misinformation and continues to do this, which is terrible because it spins a certain dialogue not based on facts or proper science.

Our medical association pushed a protocol for doctors that only supported vaccination, even though it was totally wrong and much worse for our health as a whole. Doctors who disobeyed the Australian Medical association mandates faced disciplinary action and loss of registration which basically silenced them. Nurses, health care workers, fire fighters, police and aviation personnel all had the vaccines forced on them, or they would lose their jobs! If one defied what was dictated by the state and national government, then they were fired. One pilot we know – was fired for not taking the mandated shots – slotted as “gross insubordination” which meant he could never be a pilot again – it is just SO wrong. Again insanity – and he can't get his job of over two decades back even though many pilots are dying in the cockpit currently from heart attacks caused from taking the vaccine. My daughter, a nurse with a heart defect – her valve does not close properly - was forced to take the vaccine to keep her job. So with four young kids and a mortgage, she took it and had a terrible reaction - like a stroke - was medi flown to Toowoomba hospital from Roma. Yet still was required to take the second dose to keep her job – again this IS totally unethical by the state government to enforce this! **Epecially when 99.7% of people recuperate from COVID!** With all the evidence out there – what the hell is the medical community still doing and media who all promote multiple COVID vaccinations to stay healthy? This whole mess of our pandemic response is TOTALLY against our democratic rights as people to decide what is best for us and our immediate family! It should be WITHOUT fear of losing our jobs, or being fined, or socially ostracized, if we think otherwise. Many in the medical and research field are now trying massively to get the word out that these vaccinations are terrible for our overall health. WHY are we still vaccinating our kids? They have little to no affect from COVID but the vaccine itself kills and maims, and spreads the disease from shedding. STOP the child vaccination of COVID immediately!

The WHO gave protocols like masks, isolation, and massive vaccination when it was the vaccines which shed and caused hundreds of thousands to not only get sick and die but spread this minor disease as well. I shake my head at how stupid our government was at blatantly accepting the WHO – at face value. And not looking at other cheaper alternatives, if this was a serious disease or not – which it turned out not to be. The WHO has an agenda which is not to promote health but for the world accept its dictations. Others, like [REDACTED] and the pharmaceutical companies who are rich and are stakeholders promoting all this whole lying propaganda, have profit as their main motive with world domination the goal! Currently we are willing as a country to sign up to the WHO protocols – look what they have done to the world in the last few years! Why are we so stupid as to sign up? Not only do we need individual freedoms to decide what is best for ourselves but we as a country need the freedom to decide whether we will follow the WHO protocols or not, WITHOUT being locked into a legal agreement!

Lastly is the forced isolation which has wreaked havoc worldwide – not only giving us deteriorating health worldwide, but inflation, a housing crisis, lack of job security, permanent health concerns - all of which hobble the economies. The wealth of the nations has gone to those promoting the vaccines, so countries have incurred massive debt which has changed the way our society operates in a negative way. Not only did suicide rates go up dramatically, but our kids have been physically hurt from the vaccines unnecessarily. Many are really psychologically wounded as well from forced isolation, and the continual bombardment of how scary our world is with germs! Mental health issues in kids has never been greater. Social isolation never greater. DV and family breakups is continuing to get higher. Overall a huge negative! What benefit did we actually get from all of this? Nothing, we lost billions to the drug companies who have immunity over their RNA vaccines and have just been granted a “free pass” to do whatever because they are now so rich that they are into all levels of our economies so our democratic freedoms are seriously eroded because of what they promote through their control of the media, pharmaceuticals and science itself because they fund most of the biased research out there.

My two articles are from one of the worlds top heart and immunological researchers.

Thank you for hearing me.
