

## Covid Response Inquiry Submission

I am a 56-year-old Indigenous female, whom at the start of 2020 was residing in [REDACTED] with my son and husband. As Australia's response to Covid was to lock down and I had two other children residing in Australia I came back to Australia in April 2020 to my first of two forced quarantines.

The hypocrisy of being on a plane with more than 300 passengers sitting so close to each other and then being escorted off and told you had to be 6 feet apart with police and armed forces watching every move was bizarre. For the first time in my life, I realised what it was like for Jews in Germany in WW2 and other war prisoners. I did not expect this in Australia. It was at this point that I realised that I was no longer a citizen of a free country. I had to again quarantine in 2021 and it was even worse.

I did not get vaccinated and would continually make a firm stand against mRNA vaccines due to research that I have done. (I have had all other vaccinations throughout my life, and so have my children: I am not anti-vax). Back in 2020 I was ridiculed, could not go to movies, restaurants, certain shopping centres and travel to other states. I could not visit my [REDACTED] grandfather nor visit my daughter in [REDACTED] who I could not see for three years as a result of the lockdowns. I lost all freedoms for no reason that made sense, other than fear mongering and government control and an obvious push for unproved experimental injections. I never caught Covid once, even up to this writing. All my research proved true and the steady increase of all-cause mortality deaths in Australia since the release of Covid vaccinations have shown that I was wise. **Why is the Government not investigating its own National death rates?** Every person I know who was vaccinated has had Covid multiple times. I have relatives (under the age of 20) now with chronic illness and heart issues from the vaccines. They were coerced and given wrong information but now will have a life long journey of health issues. **Why is there not adequate support for victims of vaccination injury?** The Government is not taking responsibility for its poor decisions and the consequences of its actions.

With [REDACTED] and [REDACTED] now facing many court cases for lying and deceiving the world, and proof the vaccines never worked as intended, never prevented Covid, and in fact are causing vaccinated to be more susceptible to the later strains of Covid show that the Australian Government's response was unwise, jeopardised Australians health and longevity. There were never proper scientific double-blind studies for these vaccines and yet the Government jumped on board. Why? We should never have governments dictating medical advice. My health procedures made sure I was never sick despite being with multiple people who had severe Covid, and I was safe and an asset yet lost all freedoms.

The financial cost to Australia is obscene. **Why were 255 million doses purchased for a population of 26 million people?** A cost of over \$18 billion, and more than 67% of these purchased were abandoned. 74% of [REDACTED], 67% of [REDACTED], 82% of [REDACTED] and 99.5% of [REDACTED] never used, all wasted. All that money going to Big Pharma. **Why is there no investigation and I would like to know what incentive did the government get to make such irresponsible purchases?** There is no business that could survive such incompetence.

All of this over a virus that had an infection fatality rate of 0.03% for people under the age of 60 a statistic from Standfords [REDACTED]. The median age of death in Australia from Covid as of October 2022 was 85.5 years (higher than normal life expectancy). An unbelievable over response by the Australian Federal and State Governments.

I am disappointed at the lack of transparency, of all Federal and State Governments. I am disappointed that they did not look at Sweden who showed promise and were ahead in the game. I am disappointed with the lack of investigation. I am disappointed with the lack of trust of ordinary citizens to make wise health decisions for themselves. I am disappointed that the Governments put out all the now proved disinformation, lied, coerced and scared a population into doing their bidding. I am disappointed how the Governments

manipulated media and social media platforms with propaganda that suited their narrative. Why is my question? There seems to be much more going on here than is being shown and I want it investigated. I see the government enmeshed in medical systems they have no experience in and should stay out of. It is looking a lot like a Communist situation than a free democracy, where the government works for the people. The Australian Government is clearly and has worked against its people. Very disappointing.

I implore you to investigate all areas of the Governments Covid response and have my questions answered. Hold people making these poor and unconscionable decisions accountable through our legal system. I ask that the 2017 legislation creating Provisional Registration for novel drugs be repealed and that proper safety testing be normalised. I ask for the immediate removal of all mRNA and gene-based therapies from access in Australia as they are not proving to be safe. Stop making public-private partnerships with pharmaceutical corporations like the [REDACTED] and the [REDACTED]. Keep them out of our Government and our Universities. Exit the World Health Organisation and the influence of the World Economic Forum and their globalists destructive policies.
