Re: Inquiry into the Commonwealth Government's Response to the COVID-19 Pandemic

Submission – by an Australian Citizen.

Firstly, in my opinion, the Inquiry should include the actions taken by the States and Territories that constitute the Commonwealth of Australia.

The Minutes of the National Cabinet Meetings should be made public. The Governments assumed enormous powers that were not for public consultation, consideration or discussion.

Apart from an initial two-week halt, borders remained closed, preventing Australians from returning home or leaving the country altogether: this created hardship for many citizens.

The internal border closures also saw children dying from being prevented from accessing the required cross-border medical care.

The COVID-19 response saw the denial of informed consent to medical procedure; the loss of the right to bodily autonomy; the refusal to grant medical exemptions and instead the coercion of individuals to medical procedure, against the Australian Immunisation Handbook guidelines. Australians were subjected to coercion, threats and reprisals, while the Federal Government stood by. Australians were denied the right to medical exemptions to the COVID-19 injections, while Federal politicians themselves were exempt.

The Federal Minister for Health Hon. Greg Hunt MP stated on ABC Insiders that [REDACTED]
[REDACTED]

[REDACTED] The mandated COVID-19 injections were therefore experimental: an emergency approved therapy is still experimental – breaching the Nuremberg Code, mandated on the Australian public who were coerced into having them by threats of job loss and denial of medical treatment.

The banning of early treatments, (Hydroxychloroquine, Ivermectin) and even regarding antibiotics such as Azithromycin, Doxycycline and Zinc to treat resulting bacterial infections: Australians were told to stay at home until they had difficulty in breathing. Doctors were denied the right to exercise their clinical judgement on an individual patient level. I note that [REDACTED]
[REDACTED]'s purchased stockpile of Hydroxychloroquine was destroyed by the Commonwealth, so Emergency Use Authorisation / Provisional Approval could be upheld.

AHPRA threatened and harassed medical practitioners from advising their patients on an individual level and from granting medical exemptions to those with pre-existing medical conditions for whom the COVID-19 injections were risky. These patients if they chose not to risk their health under the principle of FIRST DO NO HARM were instead subjected to public and workplace discrimination, harassment and vilification – this was absolutely unforgiveable. And

now Australians injured by the COVID-19 injections are ignored, in spite of a Vaccine Injury Compensation Scheme in existence. The Federal Government remains shamefully silent.

The COVID-19 vaccine mandates and lengthy lockdowns caused Australians loss of income, economic stress, mental health decline and suicides.

I note that Australia's prior Pandemic Plan was ignored: e.g. quarantine only of sick individuals for the purpose of isolation and TREATMENT. In addition, the established principle of Natural Immunity was completely ignored.

Finally, the former Prime Minister Scott Morrison secretly appointed himself to five different ministries; [REDACTED]

As the Australian taxpaying public paid for ALL of this, we have the right to transparency and accountability for the egregious harms done in response.

Thank you for your consideration of this Submission.
