

Dear Inquiry Panel Members, Required by my employer to take a vaccine to keep my job, I experienced this as coercion and unacceptable as an Australian. Where there is risk there must be personal choice. Informed consent to covid vaccine was impossible as government, doctors and providers did not disclose the risk of harm from covid vaccines. Financial and other conflict of interests of TGA, politicians, doctors and business must be declared. May you have courage to reveal the truth. Sincerely [REDACTED] (contact details provided, anonymous for publication)
