

## **Submission to the Covid-19 response inquiry**

Australia needs a real inquiry into the COVID-19 response.

Our freedoms weren't for the taking, and we want a proper inquiry – a Royal Commission – into COVID!

Our serious concerns include:

- . Concerns Over Specific Pandemic Measures including mask and vaccine Mandates; lockdowns and curfews; and fear-mongering communication strategies deployed by public officials.
- . Concerns Over the Composition and Scope of the Inquiry including the bias of panel members overseeing the Inquiry and the exclusion of unilateral State and Territory Government decisions.
- . The Need for a Comprehensive Inquiry that encompasses all aspects of the government's response.

Thank you for not sweeping these serious violations of the freedom of Australian citizens under the carpet,
