

I am an SA Health employee. Currently hundreds of SA Health employees have, or are, in the process of being terminated due to SA Health's vaccine policy – requirement to be vaccinated against Covid-19 to keep their job. I maintain that being vaccinated against Covid-19 does not prevent an individual from contracting or transmitting Covid-19 – Covid-19 is not a vaccine preventable disease, despite SA Health changing the definition of "vaccine preventable disease". SA Health's policy is discriminatory, illogical and against human rights.

My concerns about this enquiry include, but are not limited to –

- **Concerns Over Specific Pandemic Measures** including vaccine procurement and secret contracts, mask and vaccine Mandates; lockdowns and curfews; and fear-mongering communication strategies deployed by public officials (e.g. official misinformation and lies in the media regarding the ability of vaccines to block infection and transmission, ongoing media censorship), silencing of doctors; the role of AHPRA and ATAGI in censorship and oppression of doctors, the poor treatment of victims (vaccine injuries and deaths).

The federal government failed to introduce anti-discrimination legislation. This allowed the federal government to coerce vaccination while denying it was mandated.

The federal government need to be reminded that provisionally registered medical products rely on adverse event reporting to build the safety profile of the drug, and that if you then censor and bully people (medical practitioners, health care workers, the injured and those who "died suddenly") from criticising that drug then you will break that system, killing people.

- **Concerns Over the Composition and Scope of the Inquiry** including the bias of panel members overseeing the Inquiry and the exclusion of unilateral State and Territory Government decisions.
- **The Need for a Comprehensive Inquiry** that encompasses ALL aspects of the government's response and vaccine agreements (the Federal Government have spent billions on COVID vaccines and treatments. Giving big pharma billions of dollars for poorly tested gene-based vaccines, then having [REDACTED] CEPI, [REDACTED] (that pushes modified RNA and 100-day vaccines for the Gates Foundation) review the procurement deal might be a conflict of interest), regulatory failures of the Therapeutics Goods Administration, Australian Technical Advisory Group on Immunisation and Australian Health Practitioner Regulation Agency.

The decision to exclude actions taken unilaterally by state and territory governments means many key aspects of Australia's response will go unexamined, for example –

- **Vaccine Mandates** (currently still in place via work place policy's in many States). Why were/are State and Federal politicians and all Federal employees exempt? Politicians and Federal employees are not essential workers. Thousands of Health Care Workers have been terminated which has had a disastrous impact on the public health care system; ramping has never been worse! Coinciding with the vaccine rollout is – ramping has never been worse, and, excess deaths are 15-20% above the 5 year average (there should be a Royal Commission into excess deaths)
- **Lockdowns** (obliterated small business). Why was Kmart, Big W, Office Works and Bunnings permitted to stay open? Why were they considered as "essential services"?
- **Border closures** (vaccinated people were prevented from returning to their home State. Did the vaccines prevent COVID or not?)
- **School closures** (no clear benefits and caused social and psychological harm)
- **Mask mandates** (no clear benefits and caused psychological and physiological harm, especially to children/young people)

The policy decisions taken by all governments – as well as the implementation of those decisions – had significant human rights implications for people in Australia. There is undeniable evidence

available that there are parties that have manipulated public records (manipulating ABS data to hide excess deaths), hiding evidence and outright lying to protect the stated objective and to protect private and fiscal interests.

Australia is a federation, a democracy, and needs an inquiry that reflects this.

We need to ensure the rights and freedoms that were decimated during the pandemic are restored and better protected into the future and we need to ensure the human cost of the pandemic, which has been catastrophic, is properly understood so our emergency responses in the future do not leave people or their rights behind.

Finally, I am opposed to the removal of our freedoms by State and Federal governments in the form of vaccine mandates, mask mandates, lockdowns, and curfews, government misinformation and disinformation (e.g. the vaccines have proven to be not "safe or effective" and that we deserve a real COVID inquiry, A ROYAL COMMISSION, that will look into ALL aspects of how the 'pandemic' was (mis)handled.

My **reference documents**/evidence include, but is not limited to – PLEASE READ/WATCH!!
