

A Royal Commission must occur to investigate the crimes against humanity following the unlawful and negligent behaviour of government authorities, politicians, medical professionals, medical companies, media outlets, celebrities, and other public influencers during the covid-19 response. The following items must be addressed:

- Illegal mandates locking people in their own homes, forcing people to wear ineffective and absurd items on their face, forcing people to take unnecessary and harmful vaccines, forcing people to be separated by 6 feet or more, force closure of small businesses, limiting people's free right to congregate, limiting people's free right to exercise, restricting people right to travel freely, and many other violations of basic human rights.
- Censorship of free speech on media (including social media) which discusses, or even mentions, the word 'vaccine'. Removal of entire posts, videos, podcasts is ongoing to this day. Public discussion of the safety or efficacy of vaccines is prohibited.
- The targeting, intimidation, and arrest of individuals by police and government authorities, including pregnant women, who opposed mandates or any other forms of government control and coercion.
- Scaremongering and exaggeration by media, news channels, government advertising, politicians, celebrities, and other public influencers as to the possible dangers of covid-19.
- Transporting patients who showed signs of illness out of hospitals and locking them in nursing homes with vulnerable, but otherwise healthy, elderly people. This single government measure, whether carried out with deliberate intention to cause mass suffering, through negligence, or otherwise, undoubtedly spread the covid-19 disease, or some other flu like virus, much further causing countless unnecessary deaths and trauma to the most vulnerable of society. Opposing these measures resulted in targeting, intimidation, and illegal arrests by government authorities.
- Dereliction of duty by nursing and medical staff who decided to perform and publish 'tik tok' dance videos in the midst of a pandemic, or other flu like disease.
- Isolating vulnerable people away from their family and friends for years on end in draconian institutions whilst nursing staff instilled a climate of fear, wearing unnecessary and intimidating Personal Protective Equipment (PPE), and following illegal mandates on threat of being forced out of employment, targeted, or arrested.
- Implementing and forcing the use of harmful 'end of life' drugs such as midazolam, and harmful procedures such as forced breathing machines, on vulnerable patients if they tested positive to covid-19, exasperating the effects of covid-19 or any other flu like disease.
- Suppression of inexpensive, tested, proven, and long-standing remedies, for covid-19 and other flu like diseases, with few, if any side effects or adverse reactions. This includes hydroxychloroquine and vitamin D.
- Failure of government authorities, politicians, or medical professionals to promote healthy practices such as exercising, eating well, getting sunlight exposure, breathing fresh air, socialising, and having a positive mindset. In fact, all such aforementioned entities actively promoted the exact opposite to a healthy lifestyle and went out of their way to instil fear and dread in people in a sinister planned and coordinated way whether it be through deliberate intent to cause harm and mass suffering, negligence, ineptitude, or for other unclear reasons.
- Government authorities and politicians listening to and acting on advice from corrupt, unelected, international corporations including the World Health Organisation, [REDACTED]

██████████, United Nations, International Monetary Fund, ██████████  
██████████, World Trade Organisation, Food and Drug Administration, and other such entities.

- Corrupt procurement of vaccines, personal protective equipment, medical equipment, and other items by government authorities, politicians, and corporations.
- Misrepresentation of vaccines as being 'safe and effective' when they were documented as carrying severe adverse reactions (including death) by the Therapeutic Goods Administration (TGA), failed to stop transmission of covid-19, and failed to stop people from acquiring covid-19, or any other pathogens.
- Silencing, oppression, and shutting down of doctors by APHRA and ATAGI.
- Failure by APHRA and ATAGI to respond to complaints, concerns, or feedback from the general public or listen to, or act, on advice or research from ethical medical professionals who stood up and spoke truth by questioning the validity of the covid-19 'pandemic' response and the harmful vaccines.
- Censorship and targeting of ethical medical doctors and medical professionals who stood up and spoke truth about the inappropriate covid-19 government response and harmful vaccines.
- Failure to investigate, prosecute, or otherwise discipline doctors and other medical professionals who refused to issue vaccine exemptions to people who had suffered vaccine injuries.
- Failure of doctors, nursing staff, or other medical professionals to provide safety data or ask for informed consent from patients prior to inoculating them with harmful vaccines.
- Failure of doctors, nursing staff, and other medical professionals to acknowledge, or show any remorse, that people may have been injured by covid-19 vaccines.
- Failing of media, government authorities, and politicians to acknowledge the harms or show any remorse caused by covid-19 vaccines, apologise for their actions, or admit they may have acted in error.
- Mandating that for people who wish to remain employed and earn a living wage to first be poisoned by an experimental vaccine and then registering their own private medical information, including vaccination status, with corrupt government institutions such as Medicare and Centrelink. These institutions have repeatedly breached their own privacy policies by the leaking, either accidental or otherwise, of private and confidential patient information.
- Police brutality against unarmed, peaceful demonstrators who opposed illegal mandates and loss of basic human rights including freedom of speech.
- Illegal police roadblocks placed on interstate borders restricting free movement of travel and issuing illegal fines to people who attempted to cross borders without a valid 'covid pass'.
- Denial of entry to businesses and services without presenting a 'covid pass'.
- Mandatory covid testing, requiring the insertion of medical equipment into bodily orifices and the sampling, and storing of genetic information including DNA, for the issuance of a 'covid pass'.
- Establishment of 'quarantine zones' and tracking the movements of people and 'covid positive status' through their 'covid pass'.
- Complete lack of acknowledgement or public discussion of the sudden increase in mortality rates across Australia and the rest of the world after the implementation of forced, harmful vaccines on the population.
- Complete lack of acknowledgement or public discussion of the completely normal, steady mortality rate during the covid-19, or other flu like disease, "pandemic" of late 2019 and 2020.

These crimes against humanity, committed and perpetuated, by government authorities, politicians, medical professionals, medical companies, media outlets, celebrities and other public influencers must be exposed and those found guilty of promoting the inoculation of people with known harmful substances, or inoculating people with known harmful substances, and denial of basic human rights including freedom of speech, must be prosecuted and sentenced accordingly. Justice must be served to everyone harmed by this covid-19 response.
