

The COVID hysteria, initiated by the governments and media in Australia, was based on lies. The truth is that the COVID “vaccines” were never safe and never adequately tested. We now know that the vaccines did not stop transmission and the TGA was so irresponsible that it didn’t even bother to ask the large pharmaceutical companies if that was the case. We know that the TGA receives 96% of funding from big pharma and that is a situation which must cease because the TGA is not independent. They are beholden to large conglomerates that put profit over people. This has completely compromised the TGA, and it is no longer a trustworthy organisation. It certainly does not put the interests of the Australian people first.

Anecdotally, the vaccines have caused irreparable harms in our nation. One only has to have a cursory look at social media (e.g. [REDACTED] on Instagram) to understand that we now have an epidemic of sudden deaths, particularly among the young, which needs to be immediately investigated. I personally have knowledge of 3 deaths of young people which cannot be explained, but which have a temporal association with taking the experimental gene therapy.

We also have several friends who have been injured by the experimental gene therapy. One has strange blood clots in her lungs which have disabled her, another has [REDACTED] [REDACTED], one died [REDACTED], another died from a heart attack soon after taking the vaccine, another fit 45-year-old woman had a mini-stroke. We also know of young women [REDACTED] [REDACTED]. All of these people were vaccinated. Unfortunately, all of them have not received adequate answers from the medical fraternity and doctors are ‘baffled’ about how these complications and deaths have occurred. The government has no idea of the pain, suffering and misery that they’ve caused by unleashing these experimental products on society. There are many, many witness statements from individuals who have been harmed from these products if anyone was willing to look. <https://live.childrenshealthdefense.org/chd-tv/events/the-chd-bus-tour/covid-shots--pregnancy/>

I lost my job, and my son also lost his job throughout the ‘pandemic’ because we wouldn’t submit to the draconian mandates. I believe in bodily autonomy and therefore, would not take the experimental vaccine. Therefore, in my household we lost two incomes. My son was [REDACTED] for many months through the social isolation he was then forced to endure. I was afraid to leave him because I feared that when I arrived home, I would find him dead. If you bother to look at the suicide rates throughout the pandemic, you will find that they increased throughout this period – particularly in the more draconian states like Victoria. How can the government justify this?

Australian Professor Ian Fraser said in April 2020 on the ABC – ‘We've never made a successful vaccine for a coronavirus before. And if a vaccine elicits an immune response that misses the target cells, the result could potentially be worse than if no vaccine was given.’ He was right and now it has been proven that the vaccines increase one’s chance of infection, not decrease it. It has also been proven through scientific research that the Pfizer mRNA vaccine produces an “unintended immune response” in the body, which experts are calling a massive “developmental and regulatory failure.” And yet millions of Australians were forced to take this. “Researchers from the Medical Research Council (MRC) Toxicology Unit have discovered that the cellular machinery that ‘reads’ mRNAs ‘slips’ when confronted with repeats of a chemical modification commonly found in mRNA therapeutics. In addition to the target protein, these slips lead to the production of ‘off-target’ proteins triggering an unintended immune response,” - study published in Nature on Dec. 6, 2023.

We also now know that DNA fragments and SV40, a cancer-causing element, are found in the experimental vaccines. We also know that through the recent study titled, “N1-methylpseudouridylation of mRNA causes +1 ribosomal frameshifting,” that to “extend” the lifespan of mRNA to make vaccines, the scientists at Pfizer and Moderna swapped out a small component of the mRNA and replaced it with “N1-methylpseudouridine” (or simply pseudouridine). This new study discovered that adding in pseudouridine in the vaccine can disrupt the usual process of protein production in our cells. These are human beings that our government has destroyed – not animals in a scientific study. What’s more, the UK’s most decorated oncologist/immunologist told cancer specialists at RAD51 conference that the Covid mRNA vaccine safe and effective mantra is ‘a big lie’. Professor Angus Dalglish presented data exposing that boosters are accelerating cancer. Can you imagine the suffering and grief that the government of this country has caused?

The government needs to be responsible and investigate the excess deaths which have occurred in Australia. There has been a global surge in such deaths and other nations, such as Iceland and the Philippines, are investigating these deaths. Why isn’t the Labor government committing to such an investigation?

Another absolute abomination of the ‘pandemic’ was the government’s censorship of social media and the payment system to the media companies through tax concessions, to silence the Australian public. It’s tyrannical. How dare the government do this. What gives them the right to take away our free speech? We live in a democratic nation. We have the right to free speech. The government was the single most prevalent purveyor of misinformation during the pandemic. We all remember being told not to talk to our neighbours and that Covid could be caught from pizza boxes. It was the very act of stifling free speech and independent voices, that led to the quasi-dictatorships evident in WA, VIC, the NT and QLD. People died because of the Premiers’ reckless leadership. Independent, free-thinking doctors, who could have helped to save lives were shut down because of the government’s

interference in the social media and media companies. We all know now that easily accessible drugs like Ivermectin and Hydroxychloroquine would have helped some people who were suffering from this virus. This censorship and misleading information have definitely burgeoned a distrust in the mainstream media – which is well deserved. The length of the lockdowns, the damage that they caused and the loss of life that we endured because of them, won't be easily forgotten. The lengthy lockdowns have also damaged Australia's reputation throughout the world and that is something our governments should also be ashamed of. Locking people in their homes and denying them access to services (such as haircuts, etc) is akin to a [REDACTED] dictatorship.

Trust in the government has also been destroyed and that too is a reasonable response. Australians were subjected to disgusting, reckless and draconian government overreach and your job, as a committee, is to recommend that this sort of authoritarianism should never happen again in a free, democratic society. Charges should be brought against any politician who instigated and enforced mandates of an experimental gene therapy product.
