

COVID-19 Response Inquiry Submission

December 14, 2023

The harm done to Australia by the government's COVID-19 policies - both at State and Federal levels - warrants a full inquiry and compensation to individuals affected.

POINTS

Vaccine Mandates Causing Job Losses and Termination of Study Courses

People who lost their jobs or were refused continuation of studies at educational institutions should receive an apology and financially recompensed by the government. The psychological trauma these individuals suffered deserves full acknowledgement. Vaccine mandates made the vaccine compulsory if a person wanted to keep their job or enrolled to study. Yet the government maintained that the vaccine was voluntary.

Raiding Doctors' Offices and Taking Private Patient Records

A doctor's surgery in Melbourne was raided by plain clothed police. Patient records and the doctor's appointment book were taken. Filmed by an onlooker. The fear on the doctor's face was heartbreaking. Why? Because the doctor was suspected of prescribing Ivermectin.

Refusal of Service to Unvaccinated Individuals

These were my experiences as an unvaccinated individual:

- rejection of service at food outlets and cafes without a vaccine certificate
- a PCR or RAT required for a dentist or doctor but not required for a vaccinated person
- refusal of entry to concerts without a vaccine certificate

Related to this was avoidance by vaccinated friends who believed the government and media's unscientific line that the unvaccinated will give you COVID. As it turned out nearly every vaccinated person got COVID as did most unvaccinated of course

Media 'Demonising' the Unvaccinated and Not Publishing Accurate Information (Including suppression of negative data on the vaccine)

- media suppressed questioning of the vaccine by the public
- mention of vaccine injuries was always omitted in reports
- the media would not publish comments, or letters to the editor, which in any way queried or raised questions about the vaccine
- celebrities who cast doubt on the vaccine, like [REDACTED] and [REDACTED], were labelled an 'anti-vaxxer nut case' by the media

Australian Federal Government Indemnifies COVID-19 Vaccine Manufacturers Against Liability in the Event of Vaccine Injuries

The Australian government is paying compensation to the vaccine-injured (as reported by the Sydney Morning Herald). That is Australian taxpayers' money. Why is the government covering for this when the Pharmaceutical companies can well afford it? Why did the major parties, including the Greens, block disclosure of the terms of the agreement? The pharmaceutical companies were obviously already aware that the COVID-19 vaccine had side-effects. Freedom of Information documents in the USA show Pfizer recorded a significant number of serious injuries in its trials.

Treatment of Novak Djokovic

The Australian government must issue an apology to tennis player Novak Djokovic for its appalling treatment when he arrived. He had followed all the requirements for entry and the Australian government granted him entry. Yet upon arrival he was subjected to the most humiliating treatment. I have never been so ashamed of my government.

Threats Made to the Unvaccinated by Health Authorities

Health authorities, Premiers and the Prime Minister demonised the unvaccinated. They were our friends, family members and work colleagues but, with the mouthpiece of the media, the vaccinated were persuaded to turn on the unvaccinated. They were barred from family gatherings, Christmas celebrations and social occasions where they were once welcomed. The New Zealand Prime Minister, following Jacinta Ardern, said "the unvaccinated will be hunted down". I am now aware of just how far authorities will go no matter what harm may result for the citizens. Australia was no different in what it inflicted on its citizens.

Extended Lockdowns in NSW for the Unvaccinated

At the end of 2021 a 4 month lockdown was extended to 6 months for the unvaccinated. There was no scientific basis in connecting the unvaccinated to COVID. In fact Pfizer had already stated the vaccine did not stop transmission - said by a Pfizer executive and filmed - rendering mandates baseless but they still were implemented. The NSW government introduced a 5 kilometre travel limit during one lockdown thereby severely creating inconvenience and further stress to the population.

Masks

Masks are some sort of barrier to airborne germs and viruses but the reality is that a germ or virus is smaller than the gaps in the weave of the mask which allow the person to breathe. The fuss, and fines, over mask wearing were unnecessary. It can be voluntary of course. The media created such fear that people even wore them when driving alone in the car!

Business Closures and Resulting Hardship, Stress and Depression

Responsibility for the immeasurable financial devastation, loss of employment in the area of a person's skills, destruction of life's purpose and enjoyment, stress and depression sit squarely on the shoulders of the Australian and State governments. I know 3 nurses and 1 midwife whose employment was terminated over the mandate. Then the government says we have a crisis with shortages of nurses, police, teachers, etc.

Suppression of Natural Healthcare Procedures & Medical Information to Improve Immunity by the Media and Australian Government

Any mention of natural methods to boost immunity were banned. That included social media which wasted no time in labelling as unfactual anything that differed from the government's view. Medications that might be competition for the vaccine's promotion as a 'one-stop-shop' were suppressed.

Former Prime Minister Scott Morrison Taking Over 5 Ministries

Why did the PM take control of 5 ministries during the pandemic?

Physical Harm of Individuals by Police

At a rally in Victoria police were filmed chasing a 70 year old woman and spraying her with a painful substance while she was lying on the ground. Also in Victoria at a rally, police fired rubber bullets at a man's back, causing visible skin damage. These occurrences were actioned on citizens who were on the streets during a lockdown perhaps but there is no excusing what the police did.

CONCLUSION

The Australian Federal and State governments' response:

- was excessive and disproportionate to the threat COVID-19 posed
- destroyed businesses, careers, financial security, employment opportunities
- caused and exacerbated physical and mental health problems
- isolated people
- deprived children of social interaction essential to their early life development
- appeared to have a private arrangement with the vaccine manufacturers to suppress data on clinical trials regarding vaccine injuries
- appears to have pressured or threatened the media and social media to censor negative information about the COVID-19 vaccine
- appears to have instilled fear in, or threatened reprisals to, doctors who questioned the safety of the vaccine after observing adverse reactions to the vaccine
- showed to the public the level of disregard the government has for its own citizens and the frightening lengths it will go to for citizen compliance with its policies however detrimental those policies are
