Submission re:

Call for submissions and evidence to the COVID-19 Response Inquiry

Attention Prime Minister or whom it may concern

I am writing in response to the call for a royal commission into investigating the failings, overreach and draconian measures of the government's at the time during the Covid period some of which are still ongoing

Despite Pfizer's early public admission that injections we're not tested for transmission and did not don't people contracting the disease, the vaccine mandates continue, causing harm and death in people of all ages

The risk of hospitalisation is now been proven, the more injections you have the greater risk of hospitalisation

There was constant surveillance and fear mongering by the health ministers on a daily basis (at 11 am) and press every hour

Natural immunity was ignored and other treatments disregarded

The gagging and censorship of doctors was evident as people were unable to get informed consent

Doctors were suspended for having different researched opinions on alternative medical treatments, each patient is different and may require a different approach

Silencing of doctors with threats of de registration by AHPRA and ATAGI

Destruction and banning the use of Ivermectin

No recognition of vaccine adverse reaction and deaths

Increase in excess mortality

Change of the definition of the vaccine to MRNa drug therapy

Why was [REDACTED] trying to hide the adverse effects for 75 years

Why weren't we told about the possible side effects

How masks have never been proven to stop the spread of and virus

Lockdowns only increase the risk for people becoming sick by not getting fresh air and sunlight

The adverse affects on mental health and increase in suicide especially among young people due to the constant fear mongering

The lack of support for the elderly who were unable to receive visitors and attend essential health services and specialist

Children losing almost 6 months of essential education de to school closures and lockdowns

Medical/specialist treatment not being managed therefore certainly conditions becoming life threatening and in some cases leading to death

I am a midwife/registered nurse of over 40 years in health and have personally been mandated out of work and am still unable to return to work despite the shortages in nursing due to ongoing ineffective vaccine mandates

The emotional suffering I have endured over the forced loss of my job (which I devoted my entire working life to) are

I felt overwhelmed and abandoned by the profession I loved. I've been criticised and verbally abused for not wearing a mask despite having a mask exemption. Because I was not aloud to work I lost my sense of purpose and felt isolated, I've experienced all kinds of difficult and unexpected emotions including self harm and anger, disbelief and profound sadness.

This pain and grief has effected my physical health, making it difficult to sleep, eat, and or even thinking clearly

I have been seeing a mental health professional to help me deal with my depression since I have lost my job

Because I declined the mandated injections I was unable to purchase essential items, relying on my family to do this for me

I was excluded from family functions unless I could prove I was triple injected

I was unable to attend a funeral of a family member

I was not allowed into a family home unless I could provide evidence of vaccination

I was hospitalised following a [REDACTED] during a compulsory facial mask fitting

I was almost denied a medical procedure because I was unable to wear a face mask

I have witness fathers missing the births of their children waiting on the results of a PCR test despite having a negative RAT test

I have witnessed people seeking a specialist, denied an appointment because they were not vaccinated

I was not allowed into a pharmacy, shopping complex or supermarket unless I QR coded in

My own daughter who was coerced into taking the injections so she could continue working and provide for her family and keep her home was allowed to work whilst having COVID while I was unable to work despite never having COVID

In closing I could not and will not put anything in my body that was not correctly researched

The pharmacy companies would not disclose the side effects

My doctor was not able to give me informed consent

How could anyone trust a pharmaceutical company that was seeking a 75 year disclosure period

Regards
Michelle Speter
