Commonwealth Government COVID-19  
Response Inquiry

To Whom It May Concern

I write to express my deep concern over the COVID-19 response by the Australian government, and the NSW State Government.

The following is a summary of the unacceptable approach by State and Federal governments:

- No alternative methods of treatment were promoted. It is well known that having a strong immune system is the best defence against sickness, with high dose vitamin C and zinc the place to start. Ivermectin also is a known covid treatment. Why were these methods of treatment silenced!?
- Instead there was just one narrative which was 'get vaccinated'. The unvaccinated were considered 'second class citizens' and that is an appalling way to treat a citizen who is merely exercising bodily autonomy not to get vaccinated.
- There was no informed consent provided by government or GPs, as to the potential impacts or side effects of covid vaccinations. It was still in the experimental stage of development, and should not have been rolled out the way it was without further testing and approval.
- GPs were bullied into silence at threat of having their registration stripped from them. What happened to their oath to 'do no harm' when it comes to enforcing an experimental vaccination program?!
- APHRA and ATAGI censored doctors from speaking out if they did have the courage to do so.

As an Australian citizen, I submit that alternatives must be provided in any future pandemics in order to give citizens informed consent, bodily autonomy and alternative treatments! The Australian government must do better!

The governments' response is utterly unacceptable. A Royal Commission should be held, rather than a mere government Inquiry. The truth must come out about the illegal vaccine mandates, alleged secret contracts with vaccine manufacturers.

Yours sincerely
