

To whom it may concern.

I am writing to you as a concerned Australian citizen. Never before in my life of over 70 years have I seen the restriction of movement and doubling down on the rights of citizens as I have seen over the past 4 years. What has happened to our country where the overreach of Premiers such as Annastacia Palaszczuk have directly inflicted death and damage against the people of Queensland by her Border closures, the holding of people in quarantine, the limiting of people to enter shops and places of worship as well as stopping people from visiting the elderly, paying respects at funerals and visiting those who were ill. The unlawful "mandates" of vaccines and the eviction of people in public housing, and loss of employment for some if they did not get the experiment injection. The use of the Police to enforce this overreach by Government bodies for the mandates and the bullying by police on those who were forced to wear of masks is a violation of civil liberties and was undemocratic. The brutality of the Police on peaceful protestors, particularly in Melbourne, Sydney and Canberra and against people who wandered outside their designated areas is something that should never again happen in a democratic country. I am ashamed and horrified that the Federal Government under both Morrison and Albanese allowed this to happen. This overreach that occurred all across Australia needs to be investigated fully and every State Premier the Health Ministers and Bureaucrats involved need to be thoroughly investigated over their involvement in the treatment of Australian Citizens. This should never happen again.

Regards

Lyndall White
